QUESTIONS & ANSWERS #2

THE FOLLOWING QUESTIONS HAVE BEEN ASKED BY POTENTIAL BIDDERS. FOR YOUR INFORMATION, BELOW ARE THE QUESTIONS AND ANSWERS:

Q #1) We would like to get some details (brand, exact model) regarding the PXCM controller mentioned at article 6.2.2.4.1 of the technical specifications? In addition, item 6.2.2.4.1 says that the controller must be installed in the panel, as shown on the drawings, but this detail does not appear on the drawings.

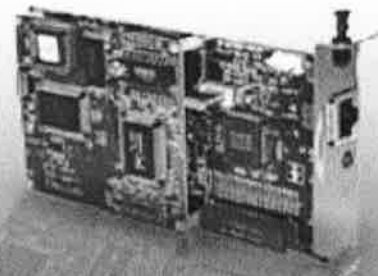

A #1) *The existing panels will stay on site and the Contractor shall provide a Veeder-Root's Ethernet-IP Communications Card with a Veeder-Root's TLS-350. The card output will be connected to the existing communication module located above the electrical panels and the phone modem. See the attached technical sheet.*

Q #2) What is the location of the existing electrical panel for the pump and the unroller (drawings 121-23520-E-001 and E-002)?

A #2) *See sketch drawing and photo attached.*

"I NEED TO BE ABLE TO GET ALL MY DATA AND REPORTS, RIGHT FROM MY ATG."

PROBLEM SOLVED.

Description **Benefits** **Specs** **Documents** **Related Information**

Connect directly to local areas (LANs) and wide areas (WANs) with Veeder-Root's Ethernet-IP Communications Card. Made for the TLS-350 and TLS-300, it allows broadband access at the site to transmit information at a specific time or in response to a specific event or alarm. Because it's an internal solution, it requires no external power supply or equipment space. It's also fully compatible with Veeder-Root's remote communications package, Inform™, and Fuel Management Services solutions.

Key Features:

- Ethernet: RJ45 (10BASE-T)
- Compatibility: Ethernet version 2.0/IEEE 802.3
- Supported Protocols: ARP, UDP, TCP, IP, Telnet, DHCP
- Easy setup and configuration
