**This solicitation amendment number four (004) is issued to answer additional questions received during the solicitation process**

**Q & A’s for Fifth Bridge Consulting and Construction Supervision  
Solicitation #5P423-13-6467**

1. Q: In order for the Consultant to provide the Required Services in section 3.6 (Construction Services, page 30 of the RFP), our understanding is that Parks Canada requires a full time on-site supervision by a Resident Construction Supervision Technician, accompanied by a Construction Supervision Engineer specifically on the seven (7) full-day visits to validate construction at key stages. Is this correct?

A: No. The Consultant's required services during the construction site work include estimated seven (7) full-day visits by one (1) professional at key stages of construction site work. The Consultant will be requested by Parks Canada if there will be a need of additional site visit(s) by a Consultant's professional. As indicated in the RFP, the Consultant's fees for additional site visit(s) during construction work will be as per Consultant's Price Proposal (Appendix C).

2- Q: Section 4.0 of the Project Brief (page 32 of the RFP) specifies October 7 as the milestone date for Site survey and geotechnical investigations. During the site visit on Monday, September 9, it was pointed out that a passage on the river bed (slightly East of the Fifth Bridge site) would be granted to transport the site survey / geotechnical equipment. Please confirm at which dates the Consultant would be authorized to cross the river.

A: The Consultant will be authorised for one-time river crossing (over and back) of vehicle and equipment for survey/geotechnical work during the period between October 15 and November 15, 2013.

3- Q: What is the desired footbridge classification: A1, A2 or B, according to Parks Canada’s “Directive for Design, Construction, and Inspection of Vehicular and Pedestrian Bridges”, Annex B of the RFP? Would a bridge capable of supporting an access by light truck be of an advantage to Parks Canada?

A: The scope of work for Design and Construction Supervision services is for a Class A1 Pedestrian Bridge

**All other Terms and Conditions remain unchanged**
