Question 1:

M.2: Please elaborate on what you would expect exactly in regards to the dedicated high-speed private network?

Answer 1:

A dedicated high-speed private network means the bidder must provide some equipment and means to communicate with their system that will not use our current internet connection, as our internet is already at its maximum bandwidth capacity. So the line does not need to be super fast but fast enough to provide the refresh rate, as defined in requirement M.2 for an average load based on the maximum number of users defined in requirement M.8

Question 2:

M.5: What specific level of integration do you expect the DWPI database to have with the rest of the patent database? Are you looking at something similar to EPOQUE? If so, could you please describe how that works?

Answer 2:

The DWPI should be available as any other database files that can be searched. So a user should be possible to search multiple database files at the same time and view the combined results from all these files as one dataset. No, we are not looking for something similar to EPOQUE.
