**Title:** Request for Supply Arrangement Laboratory Analysis

This amendment #002 is raised to answer questions for solicitation EW479-130790/C as follows:

**QUESTION 1:** For a number of our tests there are options for analysis. For example, PCB congeners can be analyzed by High Resolution Mass Spectrometry (HRMS) using EPA Method 1668A or by Low Resolution Mass Spectrometry (LRMS) using modified EPA Method 8082. The HRMS test produces data that has a level of detection which is an order of magnitude lower than the LRMS test. How should we present the method attributes of tests so a user can understand the differences in the tests and know which is appropriate for their project? Would an incremental column in the price book for method description be appropriate?

**ANSWER 1:**

Details of test attributes/method of testing will be described in any resulting Request for Proposal against the Supply Arrangement. If not enough information is provided for you at that time, you can contact the client department that is issuing the Request for Proposal to ask for more detailed information. Bidders must provide pricing in their price catalogue or current published price list for all analysis being proposed.

If your proposal has already been submitted, you may wish to revise it. Revisions to your proposal must be submitted in a sealed envelope with the contents clearly identified on the outside of the envelope. Any revisions to your proposal must be received by the Bid Receiving Unit on or before the time and date stated on page 1 of this document. Any revisions to your proposal received after the closing date and time will be considered late and will be returned unopened.

ALL OTHER TERMS AND CONDITIONS SHALL REMAIN THE SAME.
