Question #075

Bid Solicitation Document

Question #075:

We would like further clarification of a Correspondence Management System. Canada's response to Question #072 points to Point-Rated Requirements R110 and R111, which state that the solution should provide the ability to enable, manage and support a list of items. From a technical perspective, the items listed within R110/R111 consist entirely of file types to be stored digitally within the Correspondence Management System. Therefore, could it be said that "a Correspondence Management System solution provides the ability to enable, manage and support an extensive list of file types"?

Answer #075:

For the purpose of this Bid Solicitation, the following definition is provided:

"A Correspondence Management System (CMS) provides the capture, storage, processing, version control, retrieval and overall management of electronic correspondence documents, workflow and files. A CMS interfaces and interoperates with multiple types of Software including but not limited to, word processing, image recognition, text retrieval, email and database systems and data."

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
