This amendment is raised to extend the bid closing date until October 21, 2013 at 02:00 pm and to provide the following Questions and Answers:

Question 1:

"The DS designation is usually directed toward electric operated forklift. What reason is it directed toward a diesel powered machine. Automotive batteries are rated by CCA.

Answer 1:

The UL "D" or "DS" rating system is used to indicate the safety rating of a diesel engine powered industrial vehicles. The standard UL safety rating of an electric motor powered forklift is indicated by "E" or "EE" or "EX".

Question 2:

Our electrical system is 12 volt but we can use a 24 volt starter and alternator with a step down converter that allows us to utilize 12 volt lights, switches and electronics within the confines of our machine. Will this be acceptable to your customer?

Answer 2:

No - a 12V electrical system will not be acceptable. This requirement is for militarized forklifts. The 24V military electrical and lighting systems with all wiring harnesses are mandatory.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
