The purpose of this amendment is to respond to the following questions:

In ANNEX "A" under Requirement, on the second line of the second paragraph, it states {Supply, Start-Up and Training of a new "Grit Blast System"}; however, in section 6.1 it states {The Pressure blast equipment must be able to be used with "Baking Soda and other similar medias."} The issue we have, is that a Soda Blast and a Grit Blast system, are two separate entities, and are not able to be used in conjunction with each other.

Q1: Would it be possible to get clarification on which type of media is to be used?

A1: Baking Soda is the typical media utilized for this unit.

Also, in regards to the Construction of the Abrasive Blast Room Enclosure; in both Section 1.4 & 1.5, it is stated that the panels are to be fabricated from "minimum 10 gauge galvanized steel".

Q2: Is this a strict requirement, or can they be minimum 10 gauge steel (non galvanized), as the other components are not specifying Galvanized?

A2: This is a minimum requirement and all bidders will be evaluated based on this requirement.

Q3: Our Panels would be 10 Gauge Painted Steel. Will this suffice?

A3: As stated in the technical requirements a Minimum 10 gauge galvanized steel. This requirement is a minimum requirement and bidders that met or exceed this requirement will be accepted.

All other terms and conditions remain the same.
