## **Title : Field Operational Trial to Assess the Influence of In-Vehicle Displays and Driver Training**

### **Amendment No. 001**

The purpose of this amendment No. 001 is to respond to questions received by bidders and to Add Attachment B – Questions and Answers, to the Request for Proposal Solicitation Document.

At Attachment B, insert the following questions and answers:

**Q1** When responding to mandatory criteria M1 and M2 and rated criteria B, is it acceptable to use projects that are still in progress, provided that sufficient work has been completed to date to meet or exceed the requirement (e.g., an ongoing project in which a significant quantity of data have been collected and analysis has been completed)?

**A1** It is not acceptable to use projects that are still in progress. The sample projects must be successfully completed as stated in the criteria description.

**Q2** Could you please provide some further information on the questionnaires that will be provided by the Technical Authority?

a. Is the Technical Authority able to provide the questionnaires for review during this procurement process?

b. If the questionnaires cannot be provided, is the Technical Authority able to provide the approximate length (in minutes) of each of the three questionnaires that will be developed for this project?

c. If the questionnaires cannot be provided, are the questionnaires expected to have any open-ended questions? If so, approximately how many?

**A2** a. The questionnaires will not be prepared before the end of the bidding process and will not be provided during this process. There will be opportunity for the winning bidder to provide input on the questionnaire development.

b. It is expected that each questionnaire will take approximately 10 minutes to complete.

c. Responses will be in multiple choice, true/false, or Likert scale format. Open-ended questions may be included for commentary but responses for these are not mandatory.

**Q3** Does Transport Canada have a proposed process in place in case a device is not returned or is damaged when with the participants? Who will be responsible for any lost or damaged devices?

**A3** Transport Canada will be liable for missing and damaged devices.

**Q4** Will the vehicle fleet mix required for this research include those driven for commercial purposes?

**A4** This trial is intended to study only non-commercial vehicle use.

**Q5** Could you please provide some further clarification for rated criteria A2?

a. Could you provide clarification of what would be considered scientific research?

b. In order to receive full points, would the proposed Project Manager have to demonstrate 5+ years of experience cumulatively across the three criteria, or 5+ years of experience in each of the three criteria?

**A5** a. Scientific research is the application of the scientific method, used to systematically address a problem, investigate a phenomena or acquire knowledge. This work could be performed for academic, corporate, or governmental purposes. It is expected that a record is kept of the observations (data) and methodology for the research.

b. To receive full points, the Project Manager has to demonstrate 5+ years of experience in each of the three bulleted criteria. The rating will be given based on the criteria with the lowest number of years of experience

**Q6** Are we permitted to contact Persentech? If so, is there a particular contact?

**A6** Yes you are permitted to contact Persentech. Try to contact Frank Franczyk ([frank@persentech.com](mailto:frank@persentech.com)) at 1-888-647-4564.

**THERE ARE NO OTHER CHANGES TO THE SOLICITATION**
