### AMENDMENT NO. 3 REQUEST FOR PROPOSAL - TOOLKITS, GARRISON PETAWAWA

This amendment is raised to answer the following question raised by potential bidders and to extend the bidding period:.

The bidding period is hereby extended to 2:00 pm 2013-11-27.

**Question #13** - In regards to the engraving/etching required on the tool boxes, because these processes involve disturbing the paint surface, the tool boxes will be prone to rust where the etched information is found. This could then result in weakened tool boxes and increase the potential for damage.

We recommend that a stainless steel placard be used to display the tool box information necessary for the end user that can be attached to the box with two stainless steel rivets. The placard will be permanent, but the risk of rust and damage will be significantly reduced.

Should the Crown be amenable to this change, bidders will require the font as well as the sizing for the font. As well, bidders will need to know if a "generic" bar-code will work or if the Crown would prefer the placard to read something more detailed, I.e. the part number and "Property of Department of National Defence, CFB Petawawa."

**Answer #13** - Agreed.

At Annex "A", Statement of Work:

DELETE: Complete tool kits must be assigned one part number which must be etched on the toolbox surface in a scanner readable, dot-matrix and or bar code.

INSERT: Complete tool kits must be assigned one part number which must be provided on a placards, attached to the toolbox as follows:

Property of DND

2 CER

Box 1A for upper chest and 1B for lower and so on,

likewise for 450 Sqn,

Property of DND

450 Sqn

Box 1A for upper chest and 1B for lower and so on,

Font size should be 12, Times New Roman

---

**Question #14** - could you re-clarify Question #11, with regards to item 21, the measurements point towards the blade thickness as opposed to the width of the blade. If those are indeed the width of the blades could the crown please state the acceptable variance in the width, as those width sizes are not standard width sizes.

**Answer #14** - Yes it is the blade thickness and not the width.

**Question #15** - It appears that the answer to Question #4 has not been posted

**Answer #15** - They may be in different sets but all required sockets must be available.

The fact that they are not all in one case is not an issue, it just makes it easier for a tech to identify that there may be one missing. If they are Standard kits (Deep and Shallow) and Metric Kits (Deep and Shallow) that is fine.

**Question #16** - I have what I hope is a quick and easy question concerning this bid. For the tool box itself it is specified that the colour be a Hi Viz red or yellow. The last time these boxes were out for bid the tool box that meet all the specifications was only available in black and that is what was supplied. Would black be acceptable this time?

**Answer #16** - Yes

**Question #17** - Just wanted to let you know that we would not be able to ship to tools packaged in the tool Boxes as this is not safe for the tools & Boxes and would have many damages. The reason for this is each drawer having liners/mats would not secure the tools in place. The only alternative is to add tool control for each drawer (cutting out the foam for each tool to fit in 2"foam)

An Account manager can be on site when Boxes/Tools are delivered to assemble.

Please advise if this is acceptable?

**Answer #17** - Acceptable.

All other terms and conditions remain unchanged.
