

PART 1 - GENERAL

1.1 GENERAL

- .1 The work includes, but is not limited to, the supply, manufacture, design, where applicable, assembly, internal wiring, installation, connections, inspection, painting, factory testing, labour, handling, storage, anchoring, levelling, transportation, delivery, assembly, disassembly, dismantling and on-site testing, as well as guaranteeing of all equipment and components supplied.
- .2 Plans and specifications are complementary. Any installation or equipment shown on the drawings, even if not specifically indicated on the specifications, and vice versa, is part of the tender documents, as though it were indicated and shown on the specifications.
- .3 Supply all materials, labour, tools, lifting equipment, scaffolding, temporary structural supports, cranes and services required for performance of the work.
- .4 The work shall be complete, operational and safe.

1.2 SCOPE OF WORK

- .1 The work includes but is not limited to the supply, installation and connection of the following systems and equipment:
 - .1 Distribution systems, including:
 - .1 Relay panels;
 - .2 Contactors and controls;
 - .3 Conduits and wiring;
 - .2 Lighting system;
 - .3 Camera and communications system;
 - .4 Networks of empty conduits for telephones, computers, television and audio;
 - .5 Outlets;
 - .6 Connection of all electrical equipment supplied by other disciplines;
 - .7 Grounding system and associated hardware;

Rev. 00: Issued for tender (2013-11-19)

- .8 Dismantling, disassembly and relocation of equipment, as shown or indicated on the drawings;
- .9 Temporary work to maintain operation of existing facilities;

1.3 WORK PROGRAM AND WORK PERIODS

- .1 Refer to the Owner's general conditions and the architecture documents for information about the work execution program in order to take it into account in the bid documents. No supplement will be granted by the Owner owing to failure to be aware of the execution program.
