This amendment 003 is raised to provide questions with answers to potential bidders as follows:

Question 4:

Line 11 of the Particular Specifications under Section "1. Wheel Loader" states "11. The loader shall have the ability to operate a LM-220 detachable snow blower of 4490kg (9900) lbs." Is ability only referring to the capability of lifting the attachment and having the correct hydraulics to run the blower or does ability also mean having the proper control interface for the blower installed within the cab of the machine?

Answer 4:

It is only referring to the capability of lifting the attachment and having the necessary hydraulics to operate the blower..

Question 5:

Line 12 of the Particular Specifications under Section "1. Wheel Loader" states "12. Minimum dumping height at 45 degrees: 3.15 m". The specifications listed within the Particular Specifications would indicate that the customer is seeking a 3.5 – 4.0 cubic yard size class loader. In order to achieve the dump height requested with the coupler and bucket requested you would typically need a loader two to three class sizes larger. Would PWGSC find a machine with a dumping height of 2.489 meters to be an acceptable alternative?

Answer 5:

No. We will only be accepting machines that meet criteria stated in the particular specifications section.

Question 6:

Part 3 – Bid Preparation Instructions, Section 1: Technical Bid states that "In their technical bid, bidders should explain and demonstrate how they propose to meet the requirements and how they will carry out the work." Neither a Technical Information Questionnaire or Chart can be found anywhere within the solicitation. Would two copies of our product literature suffice or is PWGSC looking for something more?

Answer 6:

The bidder must demonstrate that the wheel loader complies with all the specifications mentioned in the call for proposal.

All other terms and conditions remain the same.
