**This solicitation amendment has been raised to answer questions asked by potential bidders during the tendering period.**

**Site visit Comments and Question.**

**Comments:**

- Camera #27 identified on the plans has been moved and is now located above the rear door.
- In the wet cells, the camera is to be above the toilet. No masking is allowed. Camera may only view the knees.
  - Contractor will have to drill through the chase wall. Must avoid any services (i.e. plumbing, wiring, etc) within wall.
- Site access to complete work will be Monday through Friday, 7:00am until 5:00pm MST.
- The audio recorder in the interview room is to be desk mounted.
- The Contractor will be responsible for the installation and setup of the software.
- The commissioning will include all the camera views.

**Questions:**

**Answers:**

1. Who will be responsible for the 'FIBRE' connections between the switches and the CCTV Room identified in Section 3 - Distribution Diagram?
  - i. There was an error in the Distribution Diagram and there is no fiber in this project. All cabling is Category 6 UTP cable. The Parkade switch and Floor 1 switch identified in the Diagram are actually laptops. Each Camera/monitor in the Parkade and Floor 1 is cabled back to the 1st Floor LAN Room where the cables are terminated into a patch panel in the CCTV 2-Post Rack. Each Camera/monitor on the 2nd Floor is cabled back to the 2nd Floor main CCTV Room where the cables are terminated into a patch panel in the CCTV 4-Post Rack. There are six CAT6 cables running between the 2nd Floor CCTV 4-Post Rack and the 1st Floor CCTV 2 Post Rack located in the 1st Floor LAN Room. These copper cables will act as your backbone between the main CCTV equipment on the 2nd Floor and the 1st Floor switches.
  - ii. The diagram in Section 3 will not be updated.
2. How firm is the completion date of January 31, 2014?
  - i. CBSA is willing to extend the completion date to February 15, 2014, but no further. All work must be completed by February 15, 2014.
3. Who will be responsible for the setup of the I.P. structure (i.e. Gateway, subnet mask, etc)?
  - i. The successful CCTV contractor is responsible for the setup of the I.P. structure.
4. Will the switches be bridged to another network or are they stand-alone?
  - i. The switches are stand-alone.
