Q: I see there is +10% beside the size so my hopes are it may be o.k. if it is 61" wide. For the 60" width could it be 61" rather than 60"?

A: Yes

Q: Do you know the denier of the polyester scrim as well as the size of opening, eg. 10 X 10 or 10 X 12? We don't usually go by the same description that is shown in the Composition shown in regard to percentages.

A: 18 x 9

Q: ASTM D751 does not have a composition part – Is there another test method you could point to, specifically for composition? We use AATCC 20/20A, a fiber content test.

A: The requirement for Composition (ASTM D751) has been deleted:
