(A) Amendment #001 is raised to answer the following questions from a bidder.

Questions: I would request that the specification be reviewed so as to allow more open discussion about alternatives. In one case the direct drive pump is clearly less efficient than an Intensifier which has become the industry standard in the past 10 years. The direct drive pump requires much higher operating costs, higher energy consumption and overall more maintenance.

Answer: CMAT will remove the direct drive pump mandatory requirement, A4-19.

Questions: You also have the requirement that the complete system be from one supplier (OEM) although as a system integrator we have the opportunity to combine the best of individual components that operate together at a very high level and as an integrator, we supply, install and support the complete package.

Answer: Also A4-2 (single source supplier OEM) will also be removed.

(B) Amendment 001 is also raised to modify the Solicitation document as follows:

Modify the Mandatory Technical Criteria as follows:

Refer: Annex A, Requirement, 2. Mandatory Technical Requirements

Delete: A4-2
A4-19

ALL OTHER TERMS AND CONDITIONS OF THIS SOLICITATION REMAIN UNCHANGED.
