THE SOLICITATION AMENDMENT #001 IS RAISED TO ANSWER A QUESTION FROM THE INDUSTRY.

Question # 001

Reference:

Statement of Requirement

Question #001:

As stated recently by the Chief Information Officer of the Government of Canada,

"The last key element of our future IT policy suite renewal is the creation of a directive for Cloud First. We want departments to seriously consider cloud based solutions for new or renewed applications, which would allow them to deploy applications capabilities more quickly, to leverage the investments, capacity and expertise that these commercial solutions make available, provided they meet security, privacy and service level requirements."

Corinne Charrette, Chief Information Officer of the Government of Canada, October 8, 2013

As this RFP requires a new enterprise social collaboration solution for the CBSA, **is there any reason why this could not be procured as a hosted service (that meets the stated Protected B Security Requirement) rather than installed on CBSA's infrastructure?**

As stated in the RFP, CBSA has a diverse and geographically dispersed organization and will need to leverage Web 2.0 tools for transitory information. Web 2.0 principles dictate that it enables cost reduction associated with traditional enterprise software applications. A hosted service would provide less impact (installation, configure, maintain, and upgrade essential software on personal computers and company servers) on the CBSA physical infrastructure.

A hosted service lends itself very well to being able to meet the needs of a mobile, social workforce.

Answer #001:

Canada has reviewed the request and the Bid Solicitation remains unchanged.

Due to operational requirements, CBSA is not in a position to take advantage of the SaaS model with the wiki at this time.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
