This amendment 004 is raised to provide a response to a supplier enquiry. The question and response are provided as follows:

=====

Question: Are the EX600 radios being used by the customer in VHF or UHF band?

Response: UHF.

=====

Question: Is the weight of the system being less than 75 lbs including video recording equipment (including DVR etc.)? A basic system will weigh under 50 lbs but potentially with the video cameras, DVR etc. the weight may exceed 75 lbs.

Response: System does not require a DVR as recording is not necessary, but the full system should not weigh more than 75 lbs as it must be hand carried and easily portable.

=====

Question: The Amendment #1 Q&A 2 specifies the area to be monitored as 150x150 meters. The Amendment #2 Q&A 7 specifies the UGS being Microwave and IR trip wire. The Amendment #2 Q&A 8 specifies 8 microwave sensors, 1 IR trip wire, 2 cameras with remote sensors

The above statements are at technical odds with each other as PIRs are passive infra red having a detection range of 30mx6m which means they can detect a moving hot body up to 30m. Rather than 8 sensors to cover the area you will need 5 sensors on each side for a total of 20 sensors.

Response: The 150X150 will be the perimeter, not all area inside must be monitored. In using a residence as the example, the IR trip wire will be used for a driveway. The microwave sensors and cameras will be placed at strategic locations around the area (by doorways etc). The 150X150 was more to ensure the transmitters were able to send their signals to the base station that would be located within the residence at those ranges.

=====

All clauses and conditions remain unchanged.
