Solicitation Amendment No. 001 is being issued to address the following Question & Answer:**Question:**

We are a two way radio dealer operating in Eastern Ontario and Western Quebec. We own and maintain an 84 site tower network which includes microwave backhaul in both licensed and unlicensed band with tower sites up to 100 meters. In fact several of our tower sites are in proximity to the Environment Canada Radome sites (Foymount being one example). Customers of the company include Federal Government departments, rural fire and public safety customers and commercial customers who require two way radio solutions. We have built turnkey networks to support rural fire departments such as Lanark County where we also maintain all 9 sites in this network. We operate a 29 site Motorola Connect Plus network that currently serves over 1,500 customers. We have an on-site staff of 14 service technicians with average RF experience of 20 years.

That being said, we have not specifically worked with the Doppler Weather Radomes used by Environment Canada. Hence while we feel we have all the technical capabilities required to support the product line and its maintenance based on prior experience we would like you to check with the customer to see if our background experience would allow us to qualify before we put a lot of work into responding to the tender.

As such we would request clause 1 and clause 4 to be rephrased as "... maintaining Radomes or other microwave RF equipment ..."

Answer:

Experience performing inspections and maintaining radomes are a critical component of this requirement as this work is to be performed supporting mission critical radomes. Contractor experience of similar design radomes is required and all evaluation criteria shall remain unchanged.

ALL TERMS AND CONDITIONS REMAIN THE SAME
