The purpose of this amendment is to answer the following question:

Q5. Please clarify the extent of site servicing work required on the new site in Black Lake. Please also describe what services are currently available on this site.

A1. See *"Submission Requirements and Evaluation"*, Section 2.3.3 Civil Engineering, which states, under 2.3.3.1: "all applicable civil elements to deliver this project. Elements include but not limited to site services, site grading, site parking, site access and storm water run-off and collection systems."

A geo-technical report, as well as a topographical survey, have been done and will be available to the successful proponent. The proposed site is a greenfield; sewer and water connections are located to the West across the adjacent roadway and a Sask Power cut line runs along the North of the property.
