RFP no.: 10034076/A

Q&A 003

Date: March 11, 2014

DNS/DHCP/IPAM (DDI) SOLUTION Questions and Answers

Question #	Question	SSC Response
9	Question: sections 3.14 and 3.2 of the SOW contain requirements for the licensing (per appliance without limitation) and scalability (3 million addresses) of the proposed solution. These requirements are material to the license terms and number of appliances that are bid. Please confirm whether the bidders' proposed solutions must satisfy these requirements.	The solution must allow for scalability of 3 million licenses without limitations. How a vendor wishes to implement this (across the appliances) is of their own design, but the requirement must meet our need.
10	Given that some Q&A were answered as recently as yesterday, we would ask for a 1 week extension so that we may thoroughly review the implications and incorporate any changes into our bid to ensure it is complete, compliant and comprehensive.	Canada will not extend the Closing Date.
