Description of the requirement:

The Canadian Nuclear Safety Commission has a requirement for a Business System Analyst (BSA).

The Business System Analyst will be reporting to the Director, Project Management Office Division (PMOD) and working directly with the business subject matter experts, Information Management Technology Directorate (IMTD) project managers and the project team members, the senior BSA will be accountable for interfacing with the business clients to gather, analyze, model and document business and information requirements in the format and structure determined by IMTD. The senior BSA will be required to develop system requirements specifications as well as functional specifications. This resource will be responsible for working with different divisions in IMTD to assist with the proper interpretation
