**Description of the requirement:**

The Canadian Nuclear Safety Commission has a requirement for a Project Manager (PM).

The Project Management Office Division (PMOD) of the Information Management Technology Directorate (IMTD) requires the professional services of an experienced senior IT Project Manager with strong technical and communication skills. The PM will be responsible for managing and coordinating a wide range of IM/IT projects including client facing systems development initiatives as well as infrastructure technical upgrades; and must have a sound knowledge of project management theories and practices, as well as SDLC principles, theories, policies and practices.

Reporting directly to PMOD, the PM will be accountable for project initiation, planning, execution, monitoring and control of IM/IT projects, taking responsibility for coordinating and providing effective communication on all aspects of the projects from initiation through to close-out. This also includes providing integrated information on the use of all project resources, inter-dependencies, risks, and progress.

Notice of Proposed Procurement: 87055-13-0567 – Project Manager

**Proposed period of contract:**

The proposed period of contract shall be from contract award plus 240 days and two irrevocable option periods of 120 days as Option Period 1 and 120 days as Option Period 2.

File Number: 87055-13-0567
