This amendment (4) seeks to answer vendors' questions.

Reference: Annex A Article 2.2.8

1. Question: Will all lanes in project have existing LPR or RFID equipment and do we return equipment on site to a CBSA representative or do we have to ship to a specific address?

Response: The vast majority of lanes outlined in Annex C (Deployment Schedule) will have existing LPR equipment, and no existing RFID equipment. Once existing equipment is removed by the Contractor, the CBSA will take possession of the equipment on-site and the Contractor will not be responsible to ship the equipment to a specific address.

Reference: Appendix A

2. Question: Do we connect cat 5 cable to the network at booth?

Response: As per the diagram and written description provided in Appendix A, the solution would be connected to the network via the Cat 5e or Cat 6 cables leading up to the bollards or posts where the equipment is installed. In the diagram provided in Appendix A the right most yellow dot is indicative of the location of the network cable. There should be no additional requirement for the Contractor to install or connect network cables to the booth.

3. Question: Is there available power outlets in booth to convert 120V to 24V?

Response: As each site is different, it cannot be guaranteed that all booths would have available power outlets. Where outlets are not available, there may be access to a power panel. These details will be established on a site by site basis when site surveys are conducted. Where necessary, the Contractor will be responsible for converting to 24V.

4. Question: If we have to uninstall existing equipment, do we have to uninstall cables as well?

Response: Power and network cables used by the existing equipment must not be uninstalled by the Contractor.

Reference: Annex B

5. Question: (Items 12-27) Will those items be executed at the same time of a scheduled site of Annex C or do we have to consider them as one independent installation per item ?

Response: These items are optional purchases. As such, the CBSA may choose to purchase these items on multiple (separate) occasions throughout the contract period and not necessarily at the same time as the initial deployment outlined in Annex C. Therefore the selected Contractor must be prepared to return to a site listed in Annex C – or a different CBSA site where equipment may be required – at a later point during the contract period.

**All other terms and conditions remain unchanged**
