REQUEST FOR PROPOSAL (RFP)
FOR
VEGETATION/VISTA CLEARING SERVICES
FOR
NATURAL RESOURCES CANADA (NRCAN)

A "Request for Proposal" (RFP) is the solicitation document used to seek proposals or bids from suppliers. The term "Bidder", also called the "Offeror", refers to the potential supplier submitting a proposal or a bid. **The Bidder submitting a proposal may, however, consist of several firms putting one proposal together as a joint venture. In the case of a joint venture, the combined experience of the firms forming the joint venture will be considered for the purposes of determining the Bidders' compliance to the Mandatory and Rated Requirements.**

Wherever the words "Proposal" or 'Bid' appear in this document", each shall be taken to mean the same as the other.

The MANDATORY REQUIREMENTS of this RFP are identified specifically with the words "MANDATORY", "MUST", "ESSENTIAL", "SHALL", "WILL", "IT IS REQUIRED", AND "REQUIRED". IF a MANDATORY REQUIREMENT is not complied with, the proposal will be considered NON-RESPONSIVE and will not receive any further consideration. In the context of this RFP, Non-Responsive, Non-Compliant and Non-Valid shall each be taken to mean the same as the other.

NOTICE TO BIDDERS: The following documents are enclosed and form part of this bid package:

RFP # NRCAN-5000014605, including all Parts, Appendices and Annexes as listed in the Table of Contents below.

The Bidder acknowledges that all of the aforementioned documents were received in its bid package. It is the responsibility of the Bidder to verify the inclusion of all documents, and to obtain copies of any missing items by contacting the Contracting Authority (CA) as identified on Page 1 of this RFP. Failure to obtain any missing document(s) shall not relieve the Bidder from compliance with any obligation imposed by the RFP, nor excuse the Bidder from the guidelines set out therein.

PART 2 – BIDDER INSTRUCTIONS

1. STANDARD INSTRUCTIONS, CLAUSES AND CONDITIONS

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the *Standard Acquisition Clauses and Conditions Manual* (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) Manual issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

Standard Instructions - Goods or Services - Competitive Requirements 2003 (2013-06-01) are incorporated by reference into and form part of the bid solicitation with the modifications to the text below. If there is a conflict between the provisions of 2003 and this document, this document prevails.

- **In the complete text content (except Section 3):** *delete* “Public Works and Government Services Canada” and *insert* “Natural Resources Canada”. *Delete* “PWGSC” and *insert* “NRCan”.

- **In section 2:** *delete* “Canadian suppliers are required to” and insert “It is suggested that Canadian suppliers”

2. SUBMISSION OF BIDS/ BID RECEIVING UNIT ADDRESS

It is the Bidders responsibility to ensure that proposals are delivered to the following location, by the time and date indicated on page 1 of this RFP document:

Natural Resources Canada
 Bid Receiving Unit - Mailroom
 588 Booth Street, Room 108
 Ottawa, Ontario K1A 0Y7
Attention: Serge Tshimanga

It is requested that the Bidder’s name, return address, Request for Proposal Number, and Bid Closing Date appear legibly on the outside of the envelope containing the Bidder’s proposal. Failure to do so may result in bids being misdirected. **NRCan will not assume responsibility for proposals directed to any other location.**

The onus is on the Bidder to ensure that the proposal is delivered to the location above. Not complying with the above instructions may result in NRCan’s inability to ascertain reception date and/or to consider the bid prior to contract award. Therefore, NRCan reserves the right to reject any proposal not complying with these instructions.

- 2.1 Due to the nature of the bid solicitation, bids transmitted by facsimile or electronic mail to NRCan will not be accepted.

3. ENQUIRIES - BID SOLICITATION

All enquiries must be submitted in writing to the Contracting Authority no later than ten (10) calendar days before the bid closing date. Enquiries received after that time may not be answered.

Bidders should reference as accurately as possible the numbered item of the bid solicitation to which the enquiry relates. Care should be taken by bidders to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a "proprietary" nature must be clearly marked "proprietary" at each relevant item. Items identified as proprietary will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that the Bidder do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all bidders. Enquiries not submitted in a form that can be distributed to all bidders may not be answered by Canada.

To comply with the [Code of Conduct for Procurement](#), bidders are obliged to alert the contracting authority to any factual errors that they discover in bid solicitations.

4. SECURITY REQUIREMENT

Not applicable.

5. BIDDER FINANCIAL CAPABILITY

The Bidder may be required to provide, prior to contract award, specific information with respect to their legal and financial status, and their technical and financial capability to satisfy the requirements as stipulated in this RFP. If requested, financial information to be provided shall include, but not be limited to, the Bidder's most recent audited financial statements or financial statements certified by the Bidder's chief financial officer. Information requested by NRCan is to be provided by the Bidder as stipulated in the request by the Contracting Authority.

Should the Bidder provide the requested information to Canada in confidence, while indicating that the disclosed information is confidential, Canada will then treat the information in a confidential manner as provided in the Access to Information Act.

In the event that a proposal is found to be non-responsive on the basis that the Bidder is considered not to be financially capable of performing the subject requirements, official notification shall be provided to the Bidder by NRCan.

6. IMPROVEMENT OF REQUIREMENT DURING SOLICITATION PERIOD

Not applicable

7. APPLICABLE LAWS

Any resulting contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the bidders.

8. DISCLOSURE OF INFORMATION

Any information, data and/or Intellectual Property which is provided in a proposal and is demonstrably proprietary to a Bidder, shall be so identified specifically (by paragraph, table, figure) in the proposal, and Natural Resources Canada will endeavor to protect such proprietary information, data and/or Intellectual Property in accordance with the laws of Canada and its normal policies, regulations and procedures. Any financial data and information provided by Bidders for the purpose of this RFP will be treated as "Commercially Confidential" and kept in confidence by Natural Resources Canada unless expressly stated otherwise in this RFP. Such information will not be disclosed, in whole or in part, except on a need-to-know basis for the specific purpose of proposal evaluation and for the activities related to the process of contract award, as applicable. Unless it is required to do so by law, NRCan will not divulge such data and/or information to any third party.

9. CONFLICT OF INTEREST

If NRCan determines the successful Bidder to be in a possible conflict of interest situation, the Bidder will be required, prior to entering into a contractual relationship with NRCan, to disclose any and all holdings and activities that could possibly be in a conflict, real or perceivable, with the mandate and objectives of NRCan. In the event that NRCan decides that action is necessary in order to remove such a conflict, the successful Bidder will be required to take such action (which may include divestiture of certain assets or ceasing to perform certain activities) prior to entering into a contractual relationship with NRCan.

10. BIDDERS' CONFERENCE

Not applicable.

11. SITE VISIT

Not applicable.

12. BASIS FOR CANADA'S OWNERSHIP OF INTELLECTUAL PROPERTY

The contract will not result in the development of any intellectual property.

13. BID PREPARATION INSTRUCTIONS

Natural Resources Canada encourages the use of recycled paper and two-sided printing. Reduction in the size of documents will contribute to Natural Resources Canada's sustainable development initiatives and reduce waste.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process [Policy on Green Procurement](http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html) (<http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html>). To assist Canada in reaching its objectives, bidders are encouraged to:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and/or containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.
- 3) use a numbering system that corresponds to the bid solicitation.

In support of the Policy on Green Procurement, it is requested that bidders provide their bid in separately bound sections as follows:

Section I: Technical Bid - (2 hard copies)

Section II: Financial Bid - 1 hard copy, under separate cover. Prices related to the current solicitation must appear in the financial bid only and are not to be indicated in any other section of the bid; prices referenced in the financial bid should not to be repeated in any other section of the bid.

Section III: Certifications (1 hard copies)

No payment shall be made for costs incurred by the Bidder in the preparation and submission of a proposal in response to this RFP.

All fees, associated with the transfer of data or of all documents as may be required by NRCan as part of the solicitation process, are the responsibility of the Bidder. No costs incurred by the Bidder before receipt of a signed contract or specified written authorization from the Contracting Authority can be charged to any resulting contract.

14.1 Section I: Technical Bid

In their technical bid, bidders should demonstrate their understanding of the requirements contained in the bid solicitation and explain how they will meet these requirements. Bidders must demonstrate their capability in a thorough, concise and clear manner for successfully carrying out the work as described in the Annex "A" – Statement of Work".

Bidders must respond to government bid solicitations in an honest, fair and comprehensive manner, accurately reflect their capacity to satisfy the requirements stipulated in the bid or contract documents, and submit bids and enter into contracts only if they will fulfill all obligations of the contract.

The technical bid should address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient and may result in a loss of points. In order to facilitate the evaluation of the bid, Canada requests that bidders address and present topics in the order of the evaluation criteria under the same headings. To avoid duplication, bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

It is the responsibility of the Bidder to obtain clarification of the requirements contained in the RFP, if necessary, prior to submitting a proposal. The Bidder must provide sufficient details in its proposal to substantiate compliance with what is required; all professional experience must be fully documented and substantiated in the proposal(s).

In the event of a proposal submitted through contractual joint venture, the proposal shall either be signed by all members of the joint venture or a statement shall be provided to the effect that the signatory represents all parties of the joint venture. (All members of the joint venture shall be jointly and severally or solidarily liable for the performance of any resulting contract awarded as a result of a joint venture.)

14.2 Page 1 of the RFP Document

It is mandatory that all bidders sign their submitted proposal. It is requested that all bidders complete, sign and date Page 1 of this RFP (including the name of the submitting organization, the name of the authorized signing person, appropriate addresses, telephone and facsimile numbers and business contact) prior to submitting their proposal. As the signature indicates a clear acceptance of the terms and conditions set out in the RFP, it is the Bidder's responsibility to ensure that the signatory has the authority within its organization to commit the Bidder by making such a contractual offer.

As per article 1 of Part 2, the Bidder hereby agrees, by submitting his/her proposal in response to this RFP, to all the instructions, terms, conditions and clauses detailed herein.

14.3 Section II: Financial Bid

Bidders must submit their financial bid in accordance with Annex "C"- Financial Proposal. The total amount of Goods and Services Tax or Harmonized Sales Tax must be shown separately, if applicable.

All bids are evaluated in Canadian currency. Therefore, for evaluation purposes, the noon rate quoted by the Bank of Canada as being in effect on date of bid closing will be applied as the initial conversion factor for the specified currency.

Canada will pay the exchange rate adjustment amount in Canadian currency using the prevailing noon rate on the date of payment by Canada.

14.4 Section III: Certifications

Bidders must submit the certifications as per Annex "D".

PART 3 - EVALUATION PROCEDURES AND BASIS OF SELECTION

1. EVALUATION PROCEDURES

- (a) Bids will be evaluated in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria and in conjunction with Annex "A" - Statement of Work;

ANNEX A - STATEMENT OF WORK

SW-1 BACKGROUND

The International Boundary Commission is responsible for the maintenance of an effective boundary line between Canada and the United States. One part of the work is to keep a 6.1 metre (20-foot) wide "vista" clear of trees and brush between the two countries.

Since the purpose of the vista is to demarcate the boundary between the countries, it is essential that it be accurately followed between boundary monuments and that each segment has the appearance of a straight line of even skyline width.

SW 2 – PUBLIC RELATIONS

The required work is carried out under the authority of the International Boundary Commission, which authorizes access to private property to carry out the work on the vista.

If anyone (for example, Landowners, Parks persons, Land Managers, etc.) should object to any clearing operation, the Contractor is to consult with the Commission's Field Engineer prior to proceeding in that valley. Any damages to public or private property, caused by the Contractor, shall be the responsibility of the Contractor.

The Customs laws, game laws and environmental laws of both countries must be observed by all of the Contractor's personnel. However, the International Boundary Commission, its agents, employees, etc. do have the authority to cross the boundary in the course of their duties.

SW-3 CONTRACTOR MUST MEET WITH THE PROJECT AUTHORITY (OR HIS AUTHORIZED REPRESENTATIVE) PRIOR TO COMMENCEMENT OF WORK

The Contractor **must** attend a meeting with the Project Authority (or his authorized Representative) prior to commencement of any contract work, to discuss various aspects of the work; the Project Authority (or his authorized Representative) will contact the Contractor and arrange the time, date and location for the meeting.

SW-4 SCOPE OF WORK

For estimating the amount of work in this undertaking it is emphasized that old growth at the sides of the vista characteristically have branches of greater than usual length reaching into the vista for light. Where branches extend into the vista from the sides they must be removed either by trimming or cutting the trees. In either case, this "side cutting" will be the subject of a majority of the work. It is also important that each area be closely examined to determine its location, the terrain and the actual amount of line to be cut.

4.1 Locations of the Areas to be Cleared

ZONE 1

The section of the vista to be cleared along the International Boundary between the Yukon Territory and state of Alaska, extends from monument 76 and following the boundary northerly to the Monument 70, see appendix B.

| | |
|---|-------------------------------|
| Approximate coordinates of departure point: | 66°15'00.79"N, 141°00'04.73"W |
| Approximate coordinates of arrival point: | 66°32'56.91"N, 141°00'04.59"W |

ZONE 2

The section of the vista to be cleared along the International Boundary between the Yukon Territory and state of Alaska extends from monument 70 and following the boundary northerly to the Monument 64, see appendix B.

Approximate coordinates of departure point: 66°32'56.91"N, 141°00'04.59"W
Approximate coordinates of arrival point: 66°49'33.91"N, 141°00'04.46"W

4.2 Length of Vista to be Cleared

ZONE1

The sea level distance to be cleared is approximately 33.3 kilometres (20.7 miles). The actual amount of boundary vista to be cleared can vary depending on where the line of vegetation ends. **It is the responsibility of the Contractor to determine the actual distance to be cleared including the alpine area. Horizontal distances shown do not represent the amount of line to be cleared and are listed to ensure the extent of each location.**

ZONE2

The sea level distance to be cleared is approximately 30.9 kilometres (19.2 miles). The actual amount of boundary vista to be cleared can vary depending on where the line of vegetation ends. **It is the responsibility of the Contractor to determine the actual distance to be cleared including the alpine area. Horizontal distances shown do not represent the amount of line to be cleared and are listed to ensure the extent of each location.**

4.3 Limits of the Boundary Vista

In order to be certain of the location and width of the 6.1-metre (20-foot) vista, the Contractor shall project the boundary line from boundary monument to adjacent boundary monument with a surveyor's transit or theodolite. All monuments may not be intervisible and the ability to establish a temporary intermediate point may be required.

The Contractor **shall** locate the boundary monuments and mark on the ground, the boundary line and vista limits, using brightly painted stakes or bright surveyors' tape tied to a stake, at intervals not exceeding 60 metres (200 feet) in order to provide a straight vista of uniform width. These stakes will be located on both sides of the boundary markers. **The Contractor must clear between the pickets to ensure that a 6.1-metre (20-foot) sky clearance is achieved.**

Stakes shall remain in place until the Project Authority (or his authorized Representative) has carried out the final inspection. Stakes are not required if the area along the boundary is already completely clear such as along fields and roads.

4.4 Cutting Requirements

It is critical to the Contractor that it must make certain that all brush, trees, dead trees and berry canes will be cut with power saws or brush cutters to such a width that at all places the vista will have a clear skyline, for a total horizontal width of 6.1 metres (20 ft), lying 3.05 metres (10 ft) on each side of the boundary line. Including the alpine area.

In order that the sides of the vista will be completely free of overhanging branches and trees, it may be required that a considerable number of large trees be removed or alternatively that their branches be trimmed.

All larger trees are to be carefully cut, felling them along the boundary to minimize damage to standing trees on both sides of the vista. No cut trees shall be left leaning or hung up.

Trees on the side of the vista that are damaged during the operation must be cut and then disposed of in accordance with Item 4.5 below.

No stumps shall be left as illustrated in Appendix A attached hereto. The cutting height will be 15centimetres (6 ins) for brush and berry canes, and 30 centimetres (12 ins) for all growth over 20 centimetres (8 ins) in diameter.

4.5 Disposal of Cut Trees

All branches are to be removed from the portion of the tree over 12 centimetres (5 ins) in diameter as well as any large protruding branches on the remainder or on smaller trees. All tree trunks are to be cut and branches removed so that they lie fully in contact with the ground, and away from the centre line of the vista. No trees are to be left perpendicular to the vista.

Special provincial or state requirements in the disposal of cut trees must be followed in the performance of the work. The Contractor shall attempt at all times to avoid having trees or branches falling into or across any roads, trails, fields, ditches, streams or stream beds or other bodies of water. Such debris is to be immediately removed by the Contractor.

The cut trees remain the property of the landowner. No cut tree shall be left leaning or hanging.

4.6 Crew and Equipment

The Contractor shall be responsible to provide the appropriate safety training, as well as all the necessary personnel tools, safety equipment and supplies required to complete the clearing operations. The contractor shall inform personnel of medical facilities and provide a reliable type of communication equipment.

All equipment and machinery shall be capable of performing all work as specified herein. The Commission reserves the right to inspect and approve all equipment to be used under this contract prior to commencement of the work and during the course of the work being performed.

Transportation arrangements (e.g. helicopter support) shall be the responsibility of the Contractor.

4.7 Litters and Operating Refuse

All Contractor gasoline and oil containers, as well as lunch wrappers and litter, shall be carried back from the boundary and disposed of at an approved dump site.

4.8 Protection and inspection of Boundary Monuments

While operating equipment and felling trees, all precautions shall be taken by the Contractor to protect boundary monuments from damage or disturbance. The Contractor will be held responsible for any such damage or disturbance that it may cause during the clearing operations.

The Contractor is asked to take a digital picture and condition of each monument. The pictures should be georeferenced or named appropriately with the monument name.

4.9 PREVENTIVE CLAUSES FOR THE ENVIRONMENTAL PROTECTION

While on site, the Contractor shall:

- Notify the International Boundary Commission representative of all departures from environmental clauses or, where applicable, the inability to comply with such a clause.
- In choosing the vehicles needed to perform the work, consider the characteristics of the environment (type of soil, waterway, wetland), the time of year and weather conditions, to mitigate environmental impacts.
- Refrain from keeping vehicle engines running unnecessarily.
- Ensure that equipment, construction machinery and vehicles used to perform work are in proper operating condition, that is, free of leaks, defects and malfunctions caused by excessive wear on certain parts, which could release contaminants into the environment.
- Consider noise-related inconveniences and seek to reduce the level of noise. Comply with current environmental noise standards and regulations. Where possible, especially noisy work must be done during normal working hours.
- Ensure that the work areas used are kept clean at all times, by recovering waste, materials, fuels or other substances, and by disposing of them at authorized sites.
- Take all necessary steps to prevent, control and eliminate all forms of contamination or other damage to the environment, in accordance with existing regulations. Have the necessary emergency equipment on hand in case of accidental spills. The contractor is responsible for all damage to the environment resulting from the work done.
- In the event of an accidental spill, regardless of the volume of product spilled, immediately inform the representative of the Commission. Be sure to notify the responsible department and all other government authorities concerned. Contain the spill and confine the product spilled, using appropriate emergency equipment.
- Avoid handling oil or fuel, and filling construction or other machinery less than 50 metres from a waterway or well, unless the quantities of petroleum products concerned are less than 10 litres.
- Store petroleum products at a distance of at least 100 metres from any waterway.
- Refrain from leaving any cut trees or brush in waterways.
- Pile cut saplings and other wood debris above the high water mark.
- Preferably cross over existing bridges and culverts. If there is no existing bridge or culvert, where possible, use only one site for crossing a fordable stream.
- Cross at right angles on solid ground. Prefer locations where banks are the most stable and the waterway is narrow. Place stop logs at the approaches if necessary. Avoid over-compacting banks, since this may result in destabilization.

SW-5 CHANGES TO THE PRELIMINARY PLAN/PHYSICAL LOCATION OF CONTRACTOR

It is important that the Project Authority know the location of the Contractor at all times for purposes of inspection, possible border patrol checks, etc. Therefore, any significant change to the Contractor's initial Preliminary Plan estimates for commencement and completion of each of the valleys which would take the Contractor into a location different from that stated in the initial Preliminary Plan must be reported to the Project Authority immediately upon Contractor knowledge of the change. In addition, the Contractor must report to the Project Authority upon completion of the clearing of each area.

SW-6 CONTRACTOR RESPONSIBILITY RELATING TO THE WORK

ZONE 1 & ZONE 2

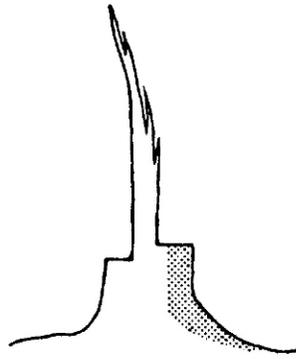

It is the responsibility of the Contractor to ensure familiarity with the terrain and growth conditions along the area stated in Article 4.1, above "Locations of the Areas to be Cleared" and to complete the work within the time period (currently estimated as May 26, 2014 to September 19, 2014) and price, as will be stated in the Contract.

If the Contractor fails to perform any of the provisions of the contract, and does not correct such failure within a period of ten (10) days after receipt of notice from the Project Authority in writing specifying such failure, the Commission will request that Public Works and Government Services issue a "Stop Work Order".

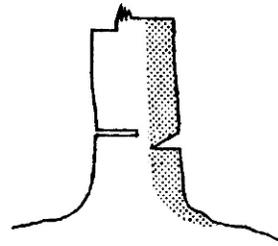

SW-7 MAPS AND SURVEY DATA

Boundary maps (scale 1:62500, dated 1914), giving details of the topography and boundary monuments along each area, will be supplied to the Contractor by the Project Authority (or his authorized Representative) prior to commencement of the Work. The Contractor is responsible for obtaining aerial photography, topographic and other maps that may be required to accomplish and/or estimate the amount of work.

1. Federal Contractors Program – Certification

Federal Contractors Program for Employment Equity - \$200,000 or more

Any bids from ineligible contractors, including a bid from a joint venture that has a member who is an ineligible contractor, will be declared non-responsive.

2.
