This solicitation amendment is issued to provide the following information to bidders:

Q1. Statement of Work, page 2, section 2, table 1. Is it possible to have the total number of polygons for each forest types per forest ecoregion in this table?

A1. See Table below. Please note, the number of "NSR" and "DI" polygons are anticipated to be significantly higher in the new inventory. Also note the 1995 inventory has a total 43029 land cover polygons. Shapefiles for the 1995 forest inventory and ecoregion are available on the ftp site. Contractors are encouraged to download these files and become familiar with all land cover types and distribution of forest for the project area.

	Long Range	Northern Peninsula	West Coast	Total
bF	1,998	4,326	5,761	12,094
bS	9	325	93	427
DI		696	404	1,100
hS	47	879	557	1,483
NSR	2	208	124	334
sH	243	1,285	1,830	3,360
tA		4		4
wB	23	559	226	808
Total	2,322	8,282	8,995	19,610

Q2. Regarding the software used for photo interpretation, Statement of Work (page 8) states: "Photo interpretation will be performed using stereo viewing software such as Purview for ArcGIS". Is it acceptable to use other stereo viewing software, such as PCI's 3D FeatureXtract?

A2. Yes. However please note the files provided to the contractor are in a format compatible with Purview. It would be the contractor's responsibility to convert the model files and digital photographs. Contractors are strongly encouraged to download the sample photographs from the ftp site to confirm file compatibility.

All other terms and conditions remain unchanged.
