This solicitation amendment 002 is raised to provide responses to questions received. All other terms and conditions remain unchanged.

Q1.) The contract document states a 12 week contract period but most the items on the project have 16-24 week lead times such as the Motorized Slide Gates and the Aeration Columns. Would it be possible to move the schedule to a 30 week construction period?

A1.) A 30 week construction period is not possible due to water requirements at the hatchery. All water supplies to aeration tower must be operational by July 16th, 2014. DFO will provide the Aeration Columns, weir slide gates, and weir slide gate actuators to assist in meeting the material lead times. The contractor is responsible for the installation and commissioning, per plan and specification, of the Aeration Columns, weir slide gates, and weir slide gate actuators. This includes, but is not limited to cycling the gates, setting actuator torque limits and setting gate travel limit switches.

Q2.) Could you please send us a copy of the as-built drawings of the Aeration tower?

A2.) Please see attached <Aeration Tower As-built drawings>.

Q3.) Would it be possible to extend the tender period a week to allow for the Aeration Columns Suppliers to get their pricing together?

A3.) The bid closing date has been extended to May 6th, 2014 @ 2:00pm as per Solicitation Amendment 001.

Q4.) Could you please clarify if this project needs bonding? It states in SI 10 that it is not required but in R2710T since it is over \$100,000 it is required.

A4.) Yes, bid security is required as per section BA07 - Bid Security. Section SI 10 refers to security clearance requirements.

Q5.) Will the Aeration tower be offline during construction of the project? If not how long can the shutdowns be for?

A5.) Yes construction is planned to take place while the aeration tower is offline. The aeration tower can be offline from June 1st – July 16th.
