Amendment 001

This amendment is raised to extended the bid closing date until May 12, 2014 at 02:00 pm and to provide Questions and Answers translated from French to English as follows:

Question 1:

Para: 3.4.2(a)

It is mentioned in paragraph 3.4.2a) a load capacity of 4082kg to comply; as it is a conversion of 9000lb of American measuring unit in kilograms and our equipment is of European manufacture, this disadvantage us because our equipment has a load capacity of 4000kg. However, this weight may be exceeded to allow reasonable extra weight without compromising safety and efficiency of the equipment. For these reasons we believe that this standard should be modified because it is essential in its current form.

Answer 1:

This requirement is for a 9,000 lbs (4082 kg) capacity forklift, as a minimum. A lower capacity will not meet user requirement.

In order to meet the rated capacity requirement of 9,000 lbs, a proof of compliance must be provided which is defined in the Technical Information Questionnaire of the Request for Proposal.

Question 2:

Para 3.8.2 a)

DND required that the fuel tanks capacity provides 8 hours of continuous use. Because fuel consumption may vary depending on the use of equipment, we would like to know the capacity to comply in liters. For information the proposed equipment will be 155 liters.

Answer 2:

Any fuel tank size is acceptable as long as this allows 8-hrs of continuous vehicle operation.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
