AMENDMENT 001

This amendment is raised to provide questions and answers to potential bidders as follows:

1. Question: The line item detail does not indicate the type of elastomer for the outer cover and the inner tube of the bellows such as Butyl, EPDM, or Neoprene for the outer cover and Butyl, EPDM3, Hypalon, Neoprene or Nitrile for the inside tube. What kind of Rubber Material is required for this expansion joints?

1. Answer: Manufactured to Defence Standard 02-345.

2. Question: We would like to know the application and what fluid would be running through the joint. What is the application and working conditions (medium, pressure, temperature) these joints are to be used for?

2. Answer: Seawater, 10 BAR

3. Question: Do you need the bolt holes on the flanges to be threaded or just open (no threads)?

3. Answer: See Special features. It states that the item is furnished with drilled and tapped (threaded) rotary flanges.

All other terms and conditions remain the same.
