AMENDMENT #006

To attach the text from amendment #005

The intent of this amendment is to answer questions from potential bidders and make a revision to the Request for Standing Offer document.

Q1. Under the answers to questions 3.3 and 3.4, I am led to believe that Canada prefers the fill/drain operating principle for its undercounters since it is ideally suited for medium to heavy soil which more accurately describe Canada's operational needs. This makes sense yet under line 2b of the spread sheet, Canada calls for "fresh water rinse" which describes the overflow type operating principle which only partly replaces the wash water and is therefore not ideally suited to medium or heavy food soil applications.

We would suggest if such is the case, that the undercounter description in 2b be changed to read fill and drain operating principle.

A1. The client agrees with the comment and was not aware the industry was using "fresh water rinse" terminology as the overflow type. We were under the impression it meant that the fresh water terminology referred to rinse water was using 100% of fresh water for its rinse cycle. Therefore in light of the clarification brought forward please delete fresh water rinse and replace with fill/drain type.

Q2. Can Bidders offer more than one make and/or model within their response in Annex B-1?

A2. Yes, more than one make and/or model may be proposed keeping in mind that the mandatory requirement must be met: **Minimum Number of Items:** The Bidder must propose a minimum of 90% of items listed in Annex B-1.

Q3. Can we get a further extension?

A3. No further extensions can be granted.

DELETION & INSERTION:

Under Annex "B" – Annex B-1

Within: 2. Under-counter Type Dishwasher

delete #2b: Fresh water rinse

insert #2b: Fill/drain type
