Title : RECONSTRUCTION OF WHARVES 97 & 98

Included in the present amendment :

1. Questions and answers 1 to 7
 2. Amendment no 3
 3. Addenda no 2
-

QUESTIONS AND ANSWERS :

Answers to questions 1 to 7 are include in addenda no 2 attached.

AMENDMENT no 3

1. Article SC02 Asphalt Price Adjustment to the Supplementary Conditions (SC) :

DELETE Article SC02
INSERT the following Article SC02

SC02 ASPHALT CEMENT PRICE ADJUSTMENT

1. The price of asphalt cement incorporated into hot mix asphalt shall be adjusted for each month in which paving occurs when the price index for that month differs by more than 5% from the price index for the month prior to bid closing. The price adjustment shall be calculated in accordance with the applicable price adjustment formula of paragraph 2.

2. Price Adjustment formulae:

a. When the price index, for the month in which paving occurs, is higher than 105% of the price index for the month prior to bid closing, Canada shall pay the Contractor a compensation of:

(Example based on a 5% increase)

$PA = (IM - 1.05 IB) \times \text{quantity of asphalt cement in tonnes}$

b. When the price index, for the month in which paving occurs, is less than 95% of the price index for the month prior to bid closing, Canada shall deduct an amount from the monthly payment to the Contractor of:

(Example based on a 5% decrease)

$PA = (.95IB - IM) \times \text{quantity of asphalt cement in tonnes}$

PA = payment adjustment for asphalt cement, in dollars

IB = asphalt cement price index for the month prior to bid closing

IM = asphalt cement price index for the month in which paving occurs

The reference price used for calculating the adjustment is the minimum price of asphalt in performance class PG 58-28, PG 58-34 or PG 64-34, as appropriate, defined in the standing offers for asphalt procurement selected by the Ministère des Transports du Québec (MTQ), as published on the Constructo Web site, official publication site of the Québec government (www.seao.ca).

The following table indicates the reference price adopted for calculating the adjustment, according to the performance class of the asphalt used during the work.

Performance class of the asphalt used	Reference price used for calculating the adjustment
PG 52-34	PG 58-28
PG 58-28	
PG 64-28	
PG 52-40	PG 58-34
PG 58-34	
PG 58-40	PG 64-34
PG 64-34	
PG 70-28	
PG 70-34	

For all other cases, the reference price used to calculate the adjustment is the one in performance class PG 58-34.

3. For each month in which a payment adjustment is made, Canada shall use the fixed asphalt cement content of the final job mix formula to determine the asphalt cement quantity that is used.
 4. The payment adjustments shall be made on the monthly Request for Progress Payment form for the months in which hot mix paving occurs.
