

PWGSC	Removal of Existing	Section 32 01 16
Gros Morne National Park	Asphalt	Page 1
Highway 430 Realignment, Deep Cove		
Project NO. R.062334.001		2014-02-10

## PART 1 - GENERAL

- |  |    |  |
|--|----|--|
| <u>1.1 Section Includes</u>              | .1 | Methods for removal of existing asphalt pavement.              |
| <u>1.2 Waste Management and Disposal</u> | .1 | Dispose of all asphalt at an approved waste disposal facility. |

## PART 2 - PRODUCTS

- |                      |    |  |
|----------------------|----|--|
| <u>2.1 Equipment</u> | .1 | Use cold milling, planning or grinding equipment or excavation with automatic grade controls capable of operating from stringline, and capable of removing part of pavement surface to depths or grades indicated. |
|----------------------|----|--|

## PART 3 - EXECUTION

- |                        |    |   |
|------------------------|----|---|
| <u>3.1 Preparation</u> | .1 | Prior to beginning removal operation, inspect and verify with Departmental Representative areas, depths and lines of asphalt pavement to be removed.  |
| <u>3.2 Protection</u>  | .1 | Protect existing pavement not designated for removal, light units and structures from damage. In event of damage, immediately replace or make repairs to approval of Departmental Representative at no additional cost to the Contract. |
| <u>3.3 Removal</u>     | .1 | Remove existing asphalt pavement to full thickness of existing asphalt as indicated on the Project Drawings.  |
|                        | .2 | Use equipment and methods of removal and hauling which do not damage or disturb underlying pavement.  |
|                        | .3 | Conduct removal of existing asphalt by cold milling, planning, grinding or excavating.  |
|                        | .4 | Prevent contamination of removed asphalt pavement by topsoil, underlying gravel or other materials.   |
