This amendment is raised to provide responses to the questions received from the industry.

Question no 1:

Achieving the required weight of 1.75kg with cast iron seems impossible. Our cast iron seals have a weight of 3.8kg, is that also acceptable instead of the 1.75kg requested maximum weight?

If a weight of 1.75kg is a must, then would you also consider lighter weight models which have steel frames (and not cast iron)?

Answer no 1:

The technical specifications of the dry seal are firm. Bids including alterations or substitutions will be deemed non compliant

Question no 2:

In order to be able to offer the best solution, can you kindly let us know the frequency of expected usage (estimate of daily impressions) for each seal ?

Answer no 2:

The daily usage of each seal is from 10 to 100 impressions per day

Question no 3:

In Annex A, Part D Paper Weight Capacity, can you please let us know how thick is your 90gsm paper?

Answer no 3:

The 90 gsm paper measures approximately 0.1mm (4 thousands of an inch) in thickness

Question no 4:

Can you kindly provide a sample of the imprint design artwork? We require it to be able to offer the best solution. If not please confirm if the imprint is an art or is just text?

Answer no 4:

The imprint design consists of a combination of line draw artwork and text. The text uses fonts Calibri 16pt (6 characters), 12pt (17 characters) and OCR-B 14pt (4 characters). No sample will be provided before contract award.

All other terms and conditions remain unchanged
