<p>Notice: This addendum shall form part of the tender documents and all conditions shall apply and be read in conjunction with the original plans and specifications.</p>		<p>Nota: Cet addenda fait partie intégrale des dossiers d'appel d'offres; toutes les conditions énoncées doivent être lues et appliquées en conjonction avec les plans et les devis originaux.</p>

Q1.

Please provide details as to the areas requiring excavation. The item B-002 in the form of tender is at 675m³. I could only see one area at station 20+143 having a requirement of full depth excavation about 175m² x .5m deep= 87.5m³

The rest of the project is a grade raise so no other excavation...please confirm the quantity.

The Granular B requirement at the full depth area listed above = 172m² x .25m x 2.25 mt/m³=97mt...your quantity in the tender item B-014 is at 50mt.

R1.

The quantity for Item B-002 - Excavation and Removal of Soils is for the removal of topsoil/grass along either side of Research Road to allow for the construction of proper granular shoulders along the rehabilitated roadway. (A 1.5m width x 0.3m depth x 2 sides x 750m was assumed.)

The excavation for any trenching that is required is included for payment under the applicable item (i.e. subdrain, catchbasin leads, electrical ducts) and as indicated in the details on the typical section drawings. Only the removal of asphalt above the trench (i.e. Item B-009 - Removal of Asphalt Pavement [Full Depth]) is paid for separately. Reinstatement of the granulars and asphalt roadway for any trenching is payable under the applicable item and is paid by the tonne. However the remaining backfill, pipe cover, etc., is again to be paid for under the subrain, CB lead, duct, etc. item. Refer to Section 01 11 11 - Pay Item Descriptions.
