**Amendment #11 is raised for the MRR Request for Proposal (RFP) number W8476-133817/E.**

***The intent of this amendment is to provide clarifying responses to Industry poised Value Proposition questions and where applicable, amend the RFP in response to Industry questions.***

Question VP11:

The Key Industrial Capabilities identified in the RFP describe technologies used in the military, commercial, and space industries. Please confirm that the Key Industrial Capability technologies being proposed by the contractor can be from military, commercial, and space technologies.

Answer VP11:

**ALL proposed KIC Market Segment VP transactions will need to be well described and have demonstrated links to the defence and security sector.**

Question VP12:

Would vehicles (land, sea, air) acquired specifically (sole use) to serve as a platform for a particular radar sensor be considered eligible as a VP transaction under the definition in section 6.2.1.1?

Answer VP12:

**Elements that are found in the identified market segments for Medium Range Radar and/or form part of the statement of work will be considered. The onus is on the bidder to demonstrate the eligibility criteria for all transactions put forward.**

Question VP13:

Would transactions of non-military / non-defence related products or services that otherwise meet the type of product or services described in each of the market segments qualify as eligible VP transactions, recognizing that some military requirements are being met by non-military technologies on an ever-increasing basis (iPhones, for example)

Answer VP13:

**Dual use products (commercial/defence) with direct links to the defense/security sector will be considered for VP transactions. The link to defence/security will need to be properly described and explained as part of the transaction.**
