This solicitation amendment 001 is raised to address bidders questions;

Question 1;

The wheel base is too short for a 20' box in a 19500 GVWR or below chassis, suggest a 25999 GVWR chassis w hydraulic brakes as the truck with body, fuel, 10000lb payload and driver is 23433 lbs.

When licensed for 24000lbs. is good for g licence in Ont.

The same licence is acceptable & the right wheelbase is available.

Answer

Replace item 5 by: GVWR of 11,000 kg maximum

Hydraulic brakes are covered in items 33 and 34.

Question 2;

Chassis requested of 19,500 GVWR does not have long enough wheelbase to accommodate a 20' vanbody and desired dock height.

Recommend chassis of 24,000 GVWR will be better specification due to interior body height, dock height, increased payload and safer on the road.

Answer

See reply for question 1.

Question 3;

Vanbody:

- Standard exterior width is either 96" wide or 102" wide. Any specific reason for 100" wide?
- Standard interior height is either 84", 96" or 102" high. Any specific reason for 100" high?

Answer;

Replace item 1 of the box by: 20' Aluminium Box (White)
102" Wide X 102" High

Question 4;

No mention of rear bumper (is standard flush steel bumper acceptable?)

Answer;

Yes, the standard flush steel bumper is acceptable.

Question 5;

There is but one manufacturer that produces a gas powered (item 7) truck that responds most of the mandatory requirements in Annex A. The closest servicing dealer for warranty is 163 kms away from Sudbury. In the general information at the beginning of Annex A it states the servicing dealer must be within 50 kms of Sudbury. How can this be addressed?

Answer;

CRA believes that many dealers located in the Sudbury area can provide this type of vehicle. The 50 km radius is a mandatory requirement for after sales service due to the operational needs and to avoid as much downtime as possible and reduce costs when the vehicle has to be repaired. The dealer selected by the bidder must be able to do the maintenance and warranty repairs, including the engine. This is in line with the After Sales Service, item 5.5.1 in the Resulting Contract Clauses.

Question 6;

Item 20 "Parking brake: spring set on rear wheels". This is standard on all air brake trucks but on hydraulic brake trucks (item 33) the parking brake is cable activated on the rear axle.

Answer;

Item 20 – Change to: Cable activated parking brake.

Question 7;

Item 28 "but not electric remote". This does not exist in the Industry. All remotely adjustable mirrors operate on 12 volts.

Answer;

Item 28 – Change to: Electric remote mirrors.

Question 8;

Item 30 "limited slip rear differential" This is available on ½ ton pickup trucks. On the requested size of chassis a locking differential can be supplied to increase traction in slippery conditions.

Answer;

Delete Item 30 "limited slip rear differential".

Question 9;

Item 29 "stabilizer bar on rear suspension" Not available of the proposed chassis. We can supply rubber auxiliary springs to control vehicle sway.

Answer;

Item 29 - Delete "stabilizer bar on rear suspension" and insert ``Rubber auxiliary springs to control vehicle sway``.

Question 10;

Box specifications Page 4 of 4 " item 10 "finished in plywood inside" Does this include the ceiling?

Answer;

No, do not require plywood on the ceiling of the box of the truck.

At Annex "A" Purchase Description;

Insert; 7a) Engine HP minimum 300

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
