Due to the technical nature of the questions and changes below, amendment 005 will be available in English ONLY.

Amendment 005 is raised to answer the following questions and incorporate the changes below:

Question 1: A plumbing contractor requested clarification as to what was to be done with the 2nd Floor plumbing upon removal of the existing kitchen sink.

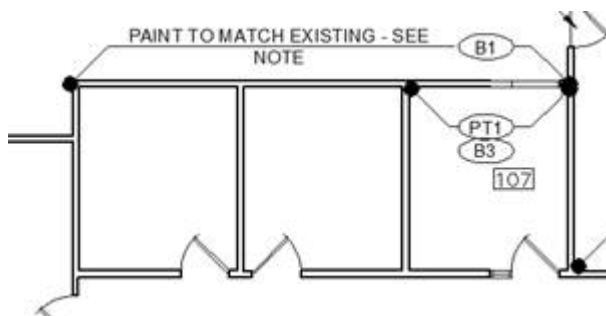

Answer to Question 1: Domestic water, sanitary and vent piping, which directly serve the sink, shall be cut back and permanently capped within the wall cavity. Provide a primed, metal, hinged access door with screwdriver lock at the remaining wall opening.

Question 2: Location: Outside Room 107

Existing textured paint is no longer available. Can an alternative be selected and will the entire wall be painted?

Answer to question 2: The entire wall to be painted as follows:

- Remove existing 4" section of chair rail and wall vinyl (below chair rail) located between the door frame and adjacent partition. Repair gypsum board and make ready to receive new paint finish.
- Prepare and make smooth existing partition, currently painted with spray applied textured paint, and make ready to receive new paint finish.
- Paint partition to match background colour of existing paint (cream).

The hand towel dispenser located above the sink in the existing kitchenette is to be relocated to Room 104 at same location above the sink.

Additional information:

Required locksmith for key control; Village Locksmith, 902-527-7702

Clarification:

Drawing A6 Door schedule: remove the words 'weather strip' from the Door schedule Notes section see Acoustic Door Seal Kit under Hardware section for requirements.

Revision:

Reference Specification Section 22 10 10 – Plumbing Pumps:

Delete: Part 2 Products
