THE ABOVE MENTIONED REQUEST FOR PROPOSAL HAS BEEN AMENDED TO ANSWER THE FOLLOWING QUESTIONS:

Question no. 1

The repeaters: Page 15 of 27: The technical requirement is asking for a trunking system. The technical requirement (page 15/27) as well as the highlighted operating modes per sector described on page 21 and 22 of 27, require more than a 'pseudo trunking' mode of operation. The foreseen system would need a control channel, thus only providing a maximum of 3 simultaneous voice talkpath. Can you clarify your requirement in terms of Trunking ? Is your requirement based on a Conventional DMR tier 2 solution ?

Answers:

The CSA require a system with a dynamic control channel, thus providing a 4 simultaneous voice talkpath.

As described throughout the Request for Proposal, the CSA requires a full trunking solution.

The CSA has not addressed a conventional DMR Tier 2 solution for this requirement.

Question no. 2

Portable model #1: page 17/27 , Portable #3, page 18/27: 403-512 MHz Mandatory technical requirement: Since the infrastructure technical requirement asked for 403-470 MHz, can you explain why you need the portable to cover 403-512 MHz ? Please clarify your requirement ?

Answers:

This is a mistake on our part for the mandatory technical requirements for mobile #1 and mobile #3 frequencies. Their correct frequency should be 403-470 MHz.

Question no. 3

Simplex voice channel: page 20 -21/27 : Throughout the document you suggested that the operating mode would involve a simplex voice channel (Analog). Since your intent, and the technology is moving to digital, in where you could use a digital direct mode communication, would you like to keep this requirement (Simplex analog frequencies) ? We would need to take this into account for Industry Canada licence approval. Please clarify your requirement ?

Answers:

The requirement is to be able to communicate portable to portable in case of a repeater failure for the Security Service and the Facilities. As far as the Communication Department is concerned, the requirement is for portable to portable Canada-wide.

Question no. 4

The actual technical requirement leads to targeted portable and mobile models as well as a unique and proprietary infrastructure solution. In order to favor an open and competitive bid

environment , would you accept an open-standard based solution proposal as a primary bid response, respecting the highlighted functional requirements ?

Answer:

This question has already been addressed in Amendment no. 2, Question no. 6.

Part 2: BIDDER INSTRUCTIONS

1. Standard Instructions, Clauses and Conditions

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the Standard Acquisition Clauses and Conditions (<http://ccua-sacc.tpsgc-pwgsc.gc.ca/pub/acho-eng.jsp>) Manual issued by Public Works and Government Services Canada.

Bidders who submit a bid agree to be bound by the instructions, clauses and conditions of the bid solicitation and accept the clauses and conditions of the resulting contract.

The 2003 (2014-06-26) Standard Instructions - Goods or Services - Competitive Requirements, are incorporated by reference into and form part of the bid solicitation.
