Amendment 002 is raised to answer a questions from Industry:

**Question 001:**

Annex A Section 2.3 references a CONOPS document:

**"2.3 CONCEPT OF OPERATIONS (CONOPS)**

Existing as a separate document, the IM System CONOPS will outline how the system will be used from the initial reporting of an incident to its final closure, to capture and disseminate information and support the planning and execution of incident management functions, while providing information to decision makers. The system will be accessible anywhere that information technology or cellular telephone infrastructure is available, or through remote connectivity via such means as satellite or land mobile radio. The CONOP will further describe how the ICS based system will assist users in planning and executing operations using the ICS structures and workflows at a level appropriate to the scale and complexity of the incident. It will be used for small scale incident investigation and response operations and be scalable to be able to deal with major complex incidents."

Is this a document that currently exists, or one which is proposed or requested as a deliverable? If it exists can we get a copy?

**Answer 001:**

The CONOPS document is an internal CCG document around which the TSOR was created. It is not available as part of the RFI.
