Solicitation Amendment

Title Heat Exchangers/Storage Tanks

Solicitation Amendment No. 004

This solicitation is hereby amended to provide the following questions and answers

Q1. What size are the heater connections?

A1. 1 inch.

Q2. What is the required tube thickness, and is there a required total surface area of the tubes?

A2. I've discussed this with the mechanical designers and the information regarding surface area and tube thickness is related directly to the design of the heat exchanger. Given the diameter of the tube, the wall thickness should be the normal size based on ASME codes.

Q3. What size of manways are required?

A3. 12 by 16 inches by inch and a quarter.

Q4. We believe the customer is not giving a chance for all interested bidders to participate in this tender. Also please be aware that fewer bidders means less competition which could end up in higher costs for the customer. To make these drawings is time consuming and it is going to cost a good amount of money; interested bidders will invest money for something not guaranteed and this is unfair. We are able to bid and supply these heat exchangers but we need the drawing clause changed to pre-award drawing instead of supplying drawings along with the bids. This also will still guarantee that the customer will get what he wants. Please we urge you to reconsider your decision on this matter.

A4. No change from previous answer.

If your bid has already been forwarded and you wish to revise same, this revision should be sent either in a sealed envelope and mailed to the above address or by facsimile (506) 851-6759 and reach the undersigned before the appropriate closing date. The solicitation number and the closing date are to be shown on the outside of the sealed envelope or on the facsimile transmission.
