The answers to the questions.

1. Maximum weight 400 lbs or 250 kg – please confirm this is in reference to parcels and not the x-ray machine **YES**
2. Dimensions Width is 30” – Will customer accept 34” (34” is typical width for x-ray with tunnel opening of 600 mm W x 400 mm H) **YES**
3. Panels must cover all access openings that are designed for insertion or removal of baggage – Please clarify if what is meant here is the Health Canada 50 cm steel shrouds on each end of the x-ray to prevent insertion of body through the lead curtains – Physical barrier shrouds (not panels) **YES**
4. Overall dimensions cannot be 190 cm (75”) because of Health Canada requirements for addition of the 50 c shrouds to each end of the x-ray (The standard length of a machine with shrouds installed is 119.3” (3030 mm) – We can modify the conveyor extensions to make the machine shorter but then have to add additional roller extensions to provide an area OUTSIDE of the shroud area to load and unload. Health Canada dictates that operators cannot insert any part of their body inside the shroud area **YES. We do accept the overall dimension be increased to 120”**
5. Item 15 security option – this is not an option – it is a Health Canada legal requirement **OK**
6. What are the dimensions of the elevator (so we can determine if system fits into elevator)
The Door dimensions: 42” Wide, 83-1/2” High
Interior dimensions: 79” Wide, 51” Deep (at the smallest location), 87-3/4” High
Maximum weight 2500 lbs
