## **SPECIFICATIONS**

### **Vertical Transportation Equipment Inspection Services**

## 1. SCOPE OF WORK

This contract covers the Labour Canada Annual Safety Inspections of elevating devices in most Federal Government owned facilities occupied by Public Service employees throughout the Province of British Columbia.

All inspections shall be carried out according to the latest *applicable* and adopted by B.C. CSA Standard CAN/CSA B44 Safety Code for Elevators, and the Canada Occupational Health and Safety Regulations and Treasury Board Directives (as found in Appendix A).

## 2. PERFORMANCE

The contractor shall inspect the vertical transportation equipment listed in the attached inventory. Attached elevator inventory is approximate, it may vary slightly from year to year. Please note that some facilities may choose to use their own inspection agency, and that is acceptable.

Contractor will certify the equipment meets the code standards and is in a safe operating condition, will identify deficiencies and make recommendations to correct problems, or will shut down equipment to prevent further use if found unsafe and in urgent need of repairs.

Contractor will immediately notify Public Works and Government Services of any elevating equipment shutdown due to a failed inspection.

### .1 Frequencies of Examination and Inclusions:

#### .1 Labour Canada Safety Inspections:

Perform an annual safety inspection of elevating devices listed on attached inventory (Appendix B).

#### .2 A certificate of inspection and test shall be provided for each elevating device inspected and shall:

- (a) be signed by the inspector who carried out the inspection or test;
- (b) include the date of inspection or test and the identification (B.C. Government ID number) of the elevating device or safety device that was inspected;
- (c) include name and address of building, and name and phone number of on-site contact person.
- (d) include equipment information: manufacturer's name, type, capacity, operating speed, number of floors.
- (d) record observations of the person carrying out the inspection and note any deficiencies and corrective action required; specify time frame for deficiency to be corrected or repaired.

- (e) leave one copy of the report on-site with contact person or in elevator mechanical room, and send another copy attached to the original invoice (see instructions on part .7).
- .3 Every record of inspection shall be retained by the operating agency in the workplace in which the elevating device is located, for a period of *at least* two years after the date on which it is signed, and shall be available at all reasonable times for inspection. *Verify that previous records of inspection are available on site.*
- .4 Where a safety inspector finds upon inspection, that an elevating device is not safe to operate the inspector shall:
  - (a) immediately seal the elevating device, post notice on equipment, and so inform the local operating agency that the use of the elevating device is prohibited;
  - (b) take possession of or cancel the certificate of inspection, if any;
  - (c) inform as soon as possible the Public Works and Government Services representative of the problem (see contacts at end).
- .5 Verify that maintenance, testing and repairs of elevating devices are being performed by a qualified contractor
- .6 Inspectors shall provide consultation and information on request whenever an investigation is being conducted by PWGSC. Copies of annual inspection reports, interpretations of code regulations, recommendations, inventory information, etc. shall be provided at no extra cost to the department. Likewise, time spent looking up contact names, addresses, e-mails, phone numbers, miscellaneous travel arrangements, and time spent searching equipment locations will not be charged as an extra cost.

Other costs due to requested additional inspections or investigations involving written reports and field travel shall be negotiated separately.
- .7 Co-operate in keeping elevator inventory (Appendix B) up to date. Notify the Department of any changes to inventory in Crown-owned buildings.

**Note:** if a Federal facility chooses to use a different inspection agency, it will be noted on the inventory listing whenever we become aware of it.
- .8 **Processing of Invoices and Certificates of Inspection:**
  - The quoted unit price per elevator will be a flat fee for the duration of the contract. No other charges for time spent in the performance of this contract will be accepted.

- Each invoice or invoices shall be issued for each site or location. Do not mix multiple sites all on one invoice.
- Provide two copies of Certificate of Inspection: send one to the location where elevator(s) is located, and second copy shall be included with the invoice sent to Public Works. Invoices received without corresponding Certificates of Inspection will not be accepted.
- For sites marked with a check mark on inventory list (Appendix B), send original invoice and legible copies of certificate of inspection to:

Public Works and Government Services Canada  
Attn. Elevator Technical Services  
219 – 800 Burrard St., Vancouver, B.C. V6Z 0B9

- Invoices sent to Public Works must include the following information:
  - PWGSC contract number
  - Your Procurement Business Number (PBN)
  - Name and address of location (where elevators are located)
  - Name of inspector, with his signature or initials
  - Elevator Provincial Identification numbers
  - The unit price being charged for each elevator
  - Certificates (reports) of inspection for each elevator
- For all other sites, send original invoice plus certificate of inspection to local facilities management

All copies must be legible, and can be either mailed to above address, or sent electronically as a PDF attachment to:  
[hector.chu-joy@pwgsc.gc.ca](mailto:hector.chu-joy@pwgsc.gc.ca)

## **.2 Safety Devices and tests:**

The elevator safety devices shall be tested by a qualified person and an inspection report certifying the results shall be submitted to the inspector.

## **. 3 Operation :**

Inspect the original performance including but not limited to, rated speed, acceleration, deceleration, door opening and door closing times, safety and governor operation.

## **. 4 Group Supervisory Control Systems :**

Inspections of the group supervisory control system, where applicable to ensure all circuits and time settings are properly adjusted to suit building traffic requirements within the design capabilities of the system.

**. 5 Exclusions :**

The Inspector is not required to make renewals or repairs necessitated by reason of negligent operation or misuse of the equipment by others or by reason of any other cause beyond his control due to ordinary wear and tear of the equipment. The Inspector is not responsible for carrying out safety tests additional to those specified in the contract nor to install additional attachment on the equipment or to make any replacements with parts of a design different to that on the equipment at the time this contract was entered into whether or not these are recommended or directed by insurance companies or by any enforcing authority.

**. 6 Working Hours and Site Security:**

Perform all work during the regular working hours of the regular working days of the elevator trade, with minimum disruption to building operations.

Phone site contact in advance to arrange inspection date.

If due to site operations the inspector can not carry out the inspection, an alternative inspection date shall be arranged with on-site authorities at no extra cost to this contract.

Find out and comply with all local site security regulations.

Inspections time frame:

All inspections shall be completed by third week of second-to-last month of contract year, and all invoices must be submitted three weeks prior to end of Federal fiscal year.

**. 7 Repairs:**

Immediately inform the Public Works and Government Services departmental representative in writing of necessary repairs not included herein.

**. 8 Wiring Diagrams and Maintenance Log:**

Check that complete schematic wiring diagrams of all equipment included in this contract and maintenance log are kept in elevator machine room.

**. 9 Payments:**

- Invoicing and payments shall be made monthly, unless no work was performed in a month, and are subject to verification by the Departmental Representative.
- Only one annual inspection charge for each elevating device per Federal fiscal year period will be accepted and paid (obtain prior authorization if additional inspection is needed).

- If contractor goes to a site where a unit has been decommissioned or removed from service, and there are no other chargeable units at that site, and no prior notice (at least one month notice) has been given, then contractor is entitled to charge the full inspection fee.

• **10 Occupational Health and Safety:**

- all work shall be performed in compliance with Worker's Compensation Board of B.C. and Canada Labour Code safety standards.

• **11 Security Clearance:**

The contractor shall submit to the Departmental Representative, for security clearance, names and addresses of all individuals who will be performing the inspections. All staff performing inspections shall obtain security clearance to "reliability status" level prior to commencing work, this is a mandatory requirement.

• **12 Contractor Technical Qualifications and Suitability Requirements:**

This service contract deals with public and employee safety, and requires security clearances to Government of Canada standards.

Only contractors with demonstrated experience, expertise, and resources to cover province-wide area will be considered acceptable.

- **Qualifications:**  
All inspection staff must have possession of a valid and current Qualified Elevator Inspector certificate by a technical authority, such as NAESA International QEI, Safety Codes Officer Level 2 (Safety Codes Council of Alberta) or be certified as a licensed Safety Officer-Elevator by the BC Safety Authority.
- **Work experience:**  
It is desirable that inspector has a minimum of 5 years full-time experience in the field.
- **Proof of elevator inspector certification:**  
Attach legible copies of pertinent certificates or diplomas. Certificates must be current, and kept validated throughout the contract period.
- **Provide a copy of Clearance Letter from Worker's Compensation Board of B.C. Maintain membership in good standing during contract period.**
- **The successful bidder must have, or be able to obtain security clearance from CIISD (Canadian and International Industrial Security Direc-**

torate) before contract can be awarded. All staff performing inspection work should be security cleared.

Public Works and Government Services will be the sole arbiter as to the suitability of contractor to carry out the scope of this contract.

## Appendix A

### **Canada Occupational Health and Safety Regulations (SOR/86-304)**

(as of June, 2014)

#### Canada Occupational Health and Safety Regulations: PART IV: ELEVATING DEVICES

4.1 This Part does not apply to elevating devices used in the underground workings of mines.

#### Standards

4.2 (1) Every elevating device and every safety device attached thereto shall

- (a) meet the standards set out in the applicable CSA standard referred to in subsection (2) in so far as is reasonably practicable; and
- (b) be used, operated and maintained in accordance with the standards set out in the applicable CSA standard referred to in subsection (2).

(2) For the purposes of subsection (1), the applicable CSA standard for

- (a) elevators, dumbwaiters, escalators and moving walks is CSA Standard CAN3-B44-M85, Safety Code for Elevators, other than clause 9.1.4 thereof, the English version of which is dated November 1985 and the French version of which is dated March 1986;
- (b) manlifts is CSA Standard B311-M1979, Safety Code for Manlifts, the English version of which is dated October, 1979 and the French version of which is dated July, 1984 and Supplement No. 1-1984 to B311-M1979, the English version of which is dated June, 1984 and the French version of which is dated August, 1984; and
- (c) elevating devices for the handicapped is CSA Standard CAN3-B355-M81, Safety Code for Elevating Devices for the Handicapped, the English version of which is dated April, 1981 and the French version of which is dated December, 1981.

SOR/88-632, s. 8; SOR/94-263, s. 10.

#### Use and Operation

4.3 No elevating device shall be used or operated with a load in excess of the load that it was designed and installed to move safely.

4.4 (1) Subject to subsection (3), no elevating device shall be used or placed in service while any safety device attached thereto is inoperative.

(2) Subject to subsection (3), no safety device attached to an elevating device shall be altered, interfered with or rendered inoperative.

(3) Subsections (1) and (2) do not apply to an elevating device or a safety device that is being inspected, tested, repaired or maintained by a qualified person.

## Treasury Board Occupational Health and Safety Directive

(as of January 1, 2011)

### **4.1 Installation and Alteration**

4.1.1 The safety inspector shall advise the operating authority when his or her inspection of an installation or alteration is complete.

### **4.2 Inspection and Testing**

4.2.1 All elevating devices require a **safe** operating certificate for each elevator. The operation certificate shall be issued by the authorized inspection agency and shall be made available to the appropriate health and safety committee.

4.2.2 The authorized inspection agency shall inspect all elevating devices.

4.2.3 The operating authority is responsible for ensuring that safety inspections are performed by authorized inspection agencies in accordance with the requirements set out in the Code and this Directive.

4.2.4 The operating authority shall provide safety inspectors with accreditation identifying them as persons qualified and authorized to perform safety inspections of elevating devices in accordance with this Directive.

4.2.5 Operating authorities shall establish and maintain a list of all elevating devices for which they are responsible that are subject to the requirements of this directive.

4.2.6 The operating authority shall provide a safety inspector conducting an inspection or test pursuant to this Directive, on request, an assistant capable of taking all necessary precautions to ensure that inspector's safety during the inspection or test and to assist in the safe conduct of the inspection or test.

4.2.7 When a safety inspector finds on inspection that an elevating device is not safe to operate, the inspector shall

(a) immediately seal the elevating device and inform the operating authority that using the elevating device is prohibited; and

(b) take possession of or cancel the certificate of inspection, if any.

4.2.8 On discovering any defect or condition in the elevating device that may render it unsafe to operate, the operating authority shall immediately take the device out of service until repairs have been completed and inspected and a new record of inspection issued.

4.2.9 The operating authority shall ensure that the maintenance and repair of elevating devices, or safety devices attached to it, is performed by a qualified person in accordance with standards that comply with good industrial safety practice.
