Amendment no. 004 is issued to provide the following questions to industry and to change the closing date as follows:

DELETE: Nov. 5, 2014 EDST

INSERT: Nov. 21, 2014 EST

Q1.

Annex B – Specification 131106 for Sleeping Mat 8465-20-008-0463

Section – 3.3.2 – Colour

Sub-section – 3.3.2.1

All components used in the Mat Retention System must be a good visual match to FEDSTD-595C colour 30097 (“Earth Brown CAMO”) or a suitable brown colour approved by The Technical Authority.

Brief: National Molding LLC of Florida, USA, who is identified as a source for buckles parts 8781 and 9173 as identified in Annex B at paragraph 3.3.4.1, have advised that they do not have a formula, nor are they considering a formula, to produce these buckles in the required colour to meet FED-STD-595C colour 30097 (“Earth Brown CAMO”) or a suitable brown colour approved by the Technical Authority as specified in Annex B at 3.3.2.1. National Molding has advised that they can supply FED-STD-595C colour 20150 (“Coyote Brown”) that will meet the Infrared Reflectance requirements identified in 3.3.3.1 of Annex B

Please can you confirm that FED-STD 595C colour 20150 “Coyote 476/478” for the above-mentioned buckles is an acceptable “brown” colour.

A1.

FED-STD-595 colour 20150 (“Coyote 476/**498**”, not “Coyote 476/**478**”) is acceptable for the buckles. Note that colour criteria are not required to be met for bid evaluation (see s. 4.1.2 of the Bid Technical Evaluation Plan); colour criteria are only required to be met after Contract award.

Q2.

Please can you confirm that if colour 20150 “Coyote 476/478” mentioned in question # 1 is acceptable for the buckles, will the same colour 20150 “Coyote 476/478” therefore be required for the other components in the Mat Retention System in sub-section 3.3.2.1 and the Mat Body itself, listed in section 3.2.3, sub-section 3.2.3.1

A2.

FED-STD-595 colour 20150 (“Coyote 476/**498**”, not “Coyote 476/**478**”) is acceptable, but not required for the components of the mat retention system (s. 3.3), and the mat body (s. 3.2). Thus, the sleeping mat may have Coyote brown buckles and straps, and an Earth brown mat body. Earth brown is preferred for all components, in particular the mat body. Note that colour criteria are not required to be met for bid evaluation (see s. 4.1.2 of the Bid Technical Evaluation Plan); colour criteria are only required to be met after Contract award.

Q3.

Is a requirement within this RFP for independent lab testing and test reports to be submitted for the raw materials through the Production stage of this opportunity? If yes, what is the frequency of the testing required for all raw materials involved and for which raw materials?

A3.

No. We have not asked for any test reports during production. However we have asked for test reports to accompany the pre-production sample. See paragraph 20 in the RFP and Appendix 1 to Annex A (SOW).

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
