To assist Canada in reaching its objectives, bidders should:

Section IV: Additional Information

1.1 Origin of Work

For each line item, bidders must identify the name(s) of the country or countries where the apparel goods are cut (or knit to shape) and sewn, regardless of whether the work is to be performed by the Bidder or one of its subcontractor(s).

The following information must be provided for each location where any of the goods are cut (or knit to shape) or sewn:

Line Item number _____

Country: _____

(Bidders must add additional lines if there is more than one manufacturer or one country per line item.)

PART 4 - EVALUATION PROCEDURES AND BASIS OF SELECTION

1. EVALUATION PROCEDURES

(a) Bids will be assessed in accordance with the entire requirement of the bid solicitation including the technical and financial evaluation criteria.

(b) An evaluation team composed of representatives of Canada will evaluate the bids.

1.1 TECHNICAL EVALUATION

1.1.1 MANDATORY TECHNICAL CRITERIA

PRE-AWARD SAMPLE AND SUPPORTING DOCUMENTATION

As part of the technical evaluation, to confirm a bidder's capability of meeting the technical requirements, one (1) pre-award sample of each item 001 and 002 Tunic, Scarlet (detailed below) as well as Certificates of Compliance and Component Samples will be required **after the bid closing date, upon a written request from PWGSC.**

- Tunic, Scarlet, NCO, Male Size 40 Regular Stock # 7025-300
- Tunic, Scarlet, NCO, Female Size 12 Regular Stock # 7030-401

Certificates of Compliance are required as defined herein, and must be dated within 18 months of solicitation posting date.

- the Lining, i.a.w. paragraph 4.1.4 of RCMP Specification
- the Fusing, i.a.w. paragraph 4.1.6 of RCMP Specification
- the Hook and Loop Tape, i.a.w. paragraph 4.1.12 of RCMP Specification
- the Thread for seams, edges and buttons, i.a.w. paragraph 4.1.13.1 of RCMP Specification
- the Thread for buttonholes and bar-tacks, i.a.w. paragraph 4.1.13.2 of RCMP Specification

(Refer to RCMP specification G.S. 1045-063, dated 2014-10-17 for further clarification.)

Component Samples: one of each component shall be provided as per RCMP specification G.S. 1045-063 paragraphs listed below:

- The fusible I, i.a.w. paragraph 4.1.6 of RCMP Specification
- The fusible II, i.a.w. paragraph 4.1.7 of RCMP Specification
- The chest piece, i.a.w. paragraph 4.1.8 of RCMP Specification
- The sleeve head pads, i.a.w. paragraph 4.1.9 of RCMP Specification
- The shoulder pads, i.a.w. paragraph 4.1.10 of RCMP Specification

The Bidder must ensure that the required pre-award samples and component samples are manufactured in accordance with the technical requirement and are fully representative of the bid submitted. Rejection of the pre-award samples and component samples will result in the bid being declared non-responsive.

An RCMP viewing sample will be provided to bidder(s) who are requested to provide pre-award samples and is to be used for guidance for all factors not covered by the RCMP specification. The RCMP specification shall govern.

The Bidder must deliver the required pre-award samples *and* certificates of compliance *and* component samples at no charge to Canada and must ensure that they are received within **28** calendar days. Failure to submit the required pre-award samples *and* certificates of compliance *and* component samples within the specified time frame will result in the bid being declared non-responsive. The samples submitted by the Bidder will remain the property of Canada.

The pre-award samples *and* component samples will be evaluated for quality of workmanship and conformance to specified materials and measurements. Minor observations will not be a reason to reject the samples unless, in the opinion of the technical evaluator(s), they are considered to render the items unserviceable. However, only one deviation will result in the bid being declared non-responsive.

The requirement for pre-award samples *and* certificates of compliance *and* component samples will not relieve the successful bidder from submitting all samples *and* certificates of compliance as required by the contract terms or from strictly adhering to the technical requirement of this Request for Proposal and any resultant contract.

PATTERNS

A pattern for regular sizes only (size 40 Regular Male and Size 12 Regular Female) will be provided to bidder(s) who will be required to submit the two (2) pre-award samples and component samples. The patterns are the property of the RCMP and must be returned to PWGSC with the pre-award samples and component samples. If a bidder fails to submit the pre-award samples and component samples within the specified time frame or chooses not to submit the pre-award samples and component samples, the patterns must be returned directly to the RCMP without delay.

CERTIFICATE OF COMPLIANCE - DEFINITION

A certificate of compliance is defined for this solicitation as a signed and dated certification by an appropriate official of the component manufacturer (e.g. **slide fastener**, hook and loop, webbing, etc.). It must specifically address the adherence of the offered component to the specification or manufacturing data of the technical requirement.

A separate certificate of compliance is required for each individual product or component. It must be dated **within 18 months of solicitation posting**.

The Bidder is to note that copies of invoices, purchase orders and Certificate of Compliance for products or components that are not manufactured by the certifier are not suitable for use as a Certificate.

Paper Patterns - Paper patterns are available from the RCMP, Technical Authority, Ottawa Ontario, under Pattern # G.S. 1045-063. Firms requested to produce Pre-contract Award Samples will be provided with the base pattern only. The full set of paper patterns (as well as electronic if requested) either in individual sizes or as a graded nest will be provided to the successful bidder after the contract is awarded. The paper pattern takes precedence over the electronic version. The patterns are referenced in English.

The paper patterns include seam allowances, drill holes and/or placement templates. Contractors may make changes required to suit their production process, however, the design and grade shall not be affected or changed. **Material shrinkage/stretch may vary and it is the responsibility of the manufacturer to make allowances in order to meet the scale of measurements included in this specification.**

All patterns are the property of the RCMP and must be returned upon completion of the contract.

Pattern Pieces – The male design has 42 pattern components and the female design has 43 pattern components.
