Addendum # 1
November 27, 2014

THE FOLLOWING AMENDMENT TO THE TENDER DOCUMENTS IS EFFECTIVE IMMEDIATELY. THIS ADDENDA SHALL FORM PART OF THE CONTRACT DOCUMENTS.

Question:

1. Is there access available to the previously completed contaminant analysis reports for the sediments dredged and then disposed of in the cell?

Answer:

1. With reference to Section 01 00 10, Part 1, Sub-Clause 24.3, the attached analytical results dated August 21, 2014, File 121811228) by Stantec Consulting Ltd, of the dredge material contained in the disposal cell, were provided to the PEI Department of Environment, Labour and Justice and it was then deemed by the Department that the historic dredge material (to the depths indicated for removal) would be restricted for use on agricultural lands. Other than that the restriction, the dredge disposal cell material can be used for all construction use including foundation backfilling, road build-up, bedding material, etc. with the exception, that the dredge disposal cell material (or any material) can be used for infilling sensitive environmental land (i.e. wetlands, salt marsh, etc.)

Question:

2. Also, has there been any thought given to removing the channel dredging from the larger job and have it completed as part of the annual dredging or separate contract. I believe this will lead to far more competitive pricing on the infilling and boat pen portions of the project.

Answer:

2. With reference to this inquiry, there has been, and will be, no consideration to remove any component of dredging from the Harbour Development (Project R.034760.001) tender.
