Please amend the above mentioned bidding solicitation with the changes here below in relation to questions and comments in suspend dated December 2nd 2014.

Item No.1 / Question 1:

Theoretical studies may be made by the bidder, but no firm can guarantee future results, does this circumstance will be considered on the bidder's responsibility to provide a valid study?

Answer 1:

The results of the study will be considered, depending on its degree of accuracy (margin of error), to establish the level of responsibility of the bidder. In short, the bidder will be able to meet the performance results demonstrated and proven in the study provided. Canada reserves the right (or to use the services of an expert) to validate the study.

Item No.2 / Question 2:

Working Instructions, Page 1, Deliverables, paragraph 2 "The boat's performance with the new engines will allow us to reach a speed of 20 knots for a continuous period of 3 hours without overheating". Can this Contract Clause be removed and replaced with a goal considering the lack of technical information for valid studies?

Answer 2:

The boat operator is confident that the requested engine (or equivalent) will be sufficient to meet its needs. However, the study is also required to confirm that the entire propulsion system identified by the Bidder will meet the needs. However, it is relevant to point out that the boat has reached a speed of 32 knots in the past. See also response to Question 1 above.

Item No.3 / Question 3:

In the general additional conditions 4001 (2013-01-28), does the 1-year warranty or 800hrs of operation would be sufficient?

Answer 3:

The 1-year warranty or 800hrs of operation is sufficient. In addition, Part IV - Additional Conditions: Lease, do not apply.

Item No.4 / Question 4:

In the general additional conditions 4001 (2013-01-28), does the bidder have to consider making oil changes or air filter changes recommended in the manufacturer's maintenance instructions?

Answer 4:

The bidder does not have to consider making changes oil or air filter. In addition, Part V - Additional Conditions: Maintenance, do not apply.
