01 31 19	Weekly Progress Report	Weekly or as directed by DR
01 31 19	Community Meeting Requirements	Submit for review 14 days prior to seminar
01 31 19	Submit Certificate of Substantial Completion	At close-out meeting

**This Amendment #004 to Solicitation #EQ699-151177/A is raised to address bidder enquiries as follows:**

Q1. Request to extend time after tender award from 10 to 15 days as per Table 01 33 00-1 Contract Submittal Schedule, Page 3 of 7.

A1. Granted. See attached updated table.

Q2. Confirm if sawdust can be substituted for peat moss for cuttings disposal. Clause 2.9, Section 33 99 99.01 Gas Well Abandonment, Page 4 of 9.

A2. Yes.

Q3. Request to delete the requirement for Power Tongs. Clause 2.17 Section 33 99 99.01 Gas Well Abandonment, Page 6 of 9. Substitution of positional thread vs rotational torque for the casing can be safely and technically effective alternative.

A3. No, casing must be torqued to API specs as per the abandonment program. This is standard practice.

Q4. Confirm if a different thread for the casing requirement can be substituted. Clause 2.3, Section 33 99 99.01 Gas Well Abandonment, Page 2 of 9. Related to Clarification Request 3, above.

A4. It is important to keep thread connections that are common in the oil and gas industry. We assume the bidder is asking if they can use buttress or some other type of square thread. If that is the case, then positional make up is acceptable. However, they need to specify exactly what casing/thread they are proposing and how they plan to achieve the torque required to turn the casing to the required position. Substitutions must be approved by Departmental Representative.

Q5. Confirm supply of 20m total length of 406mm Conductor barrel is adequate. Clause 2.3, Section 33 99 99.01 Gas Well Abandonment, Page 2 of 9.

A5. Contractor must supply enough pipe to be driven to the depth specified in the program, plus whatever they need for upstand for the piledriver, and an allowance for material that may be damaged while driving.

Q6. Re: Inner string of NX 88mm tubing on Well 7. Request that provision for additional operational costs are provided for by a "Change of Order" or "PAW" agreement, outside of the Annex H Lump Sum Cost Breakdown. Fishing equipment will be on site for latching and retrieval of the 3 ½" inner string. Request is only for operations or fishing requirements beyond retrieval of the 4 ½ Surface Casing.

---

A6. The existence of the 88.9 mm inner string was identified in the last clarification, and should be included in the bidders price. However, if the inner string is stuck in the hole and cannot be pulled using standard fishing tools (spear or overshot, etc.) then it would be reasonable to pay additional operating time and expenses as approved by Departmental Representative

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.**
