AMENDMENT 001

This Amendment is raised to respond to questions posed in response to the RFP.

Q1. Why is a net build size minimum of 12 x 8 x 6 inches required?

A1. The minimum size is necessary to ensure the printer produces sufficiently large objects for RMC projects.

Q2. Why is the minimum layer thickness of 28 microns required?

A2. A "high definition" level of detail is required so a 28-micron thickness, an industry standard, was deemed appropriate for the requirement based on RMC's operational needs.

Q3. Why must the printer handle Simulated Polypropylene-like material?

A3. The printer is to be used in the development of snap-fit assemblies and functional prototypes that use the Simulated Polypropylene-like material.

Q4. Why must the printer not use wax-based support?

A4. RMC's current 3D printer uses wax-based support, and a non-wax-based model is required to bypass the steps of using heat and detergent to finish the resulting models.

Q5. Why is a water-based support removal apparatus required?

A5. In order to function normally with water-based support, an appropriate apparatus to remove leftover support is required.

Q6. Why is a print head replacement required?

A6. Print heads may become damaged through wear and tear, power outages, or continual use for 24-hour periods or longer on-site. Therefore a model that includes a replacement head for minimizing the printer's downtime when repairs are needed is essential.

ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED
