GEO-BLASTER®
WET-ABRASIVE BLASTING EQUIPMENT

GEOBLASTER® Equipment is the most reliable, and productive Wet-Abrasive Blasting Equipment available on the market today.

As experience contractors, our equipment is built from a solid background, using Wet-Abrasive since 1993. All GEOBLASTER® Models are designed to operate efficiently with different sizes of compressors, and will run longer hose lengths, leaving the others behind.

GEOBLASTER® uses Industry Standard components, stainless steel frames, water tanks and control panels, and our pressure pots are designed specifically for Wet-Abrasives.

Frequently Asked Questions

What is Wet-Abrasive Blasting?

Abrasive is immersed in, and pressurized by water, then injected into regulated compressed airflow. The ability to adjust the blasting pressure as it discharges over a surface means wet abrasive blasting is a cost-effective and environmentally safe surface cleaning and preparation method.

Is ANY form of Wet Blasting Dust-Free?

No, if a builder tells you their system is "Dust-Free" or "100% Dustless", ask them for their Air Quality Control Report to prove their claim. The term "Dustless Blasting" is misleading, and if claimed should be backed up by scientific evidence.

Is Wet-Abrasive Blasting Spark-Free?

No, if a builder tells you their system is "Spark-Free", ask them to prove their claim. In our experience no type of Wet Blasting is spark-free, as dislodging scale with pressure washers can create spark.

What is the difference compared to Dry Blasting?

The GEOBLASTER® wet blasting process eliminates more than 90% of the ambient dust, eliminates abrasive embedment in the substrate, and produces a more consistent finish. Wet Abrasive consumption is 1/6th to 1/10th of the volume of traditional dry blasting methods, which makes it not only the safest and greenest option, but the most economical wet-blast option as well.

What about the environmental impact?

There are many abrasives that are non-toxic and environmentally friendly and after use, can be disposed of easily and properly.

What results can I expect?

GEOBLASTER® wet blast equipment will remove the toughest coatings, yet can be adjusted to clean the most fragile surfaces, without embedment or damage. Whether removing corrosion on a battleship or removing graffiti from sandstone, Wet-Abrasive cleaning is extremely versatile.

What about Flash Rust?

In many cases the process of wet abrasive blasting, and air-drying the substrate, flash rust can be inhibited. Certain applications will require the use of organically based and environmentally friendly Salt & Chloride Removers that can be mixed directly with the water.

GEO-BLASTER®

WET-ABRASIVE BLASTING EQUIPMENT

GEOBLASTER® SA SERIES

Comes complete with:

- 400 or 600 lb Capacity Blast Pot
- Stainless Steel Control Panel
- Stainless Steel Frame
- 50 ft. of Blast Hose and Fittings
- Electric or Pneumatic Safety Switch and Lines
- XL Performance Nozzle

Dim: 36" x 36" x 48"
Weight: 700 lbs.
Air: 185 or 375CFM

GEOBLASTER® GB400 Model

Comes complete with:

- 400 lb Capacity Blast Pot
- Stainless Steel Control Panel
- Stainless Steel Frame
- Stainless Steel 100 gal. Water Tank
- 50 ft. of Blast Hose and Fittings
- Electric or Pneumatic Safety Switch and Lines
- XL Performance Nozzle

Dim: 60"x36"x48"
Weight: 800 lbs.
Air: 185 or 375CFM

PROVEN. PRODUCTIVE.

GEO-BLASTER®

WET-ABRASIVE BLASTING EQUIPMENT

GEOBLASTER® GB600 Model

Comes complete with:

- 600 lb Capacity Blast Pot
- Stainless Steel Control Panel
- Stainless Steel Frame
- Stainless Steel 100 gal. Water Tank
- 50 ft. of Blast Hose and Fittings
- Electric or Pneumatic Safety Switch and Lines
- XL Performance Nozzle

Dim: 60"x36"x54"
Weight: 900 lbs.
Air: 185 or 375CFM

GEOBLASTER® GB1200DT Model

Comes complete with:

- 2 - 600 lb Capacity Blast Pot
- Stainless Steel Control Panel
- Stainless Steel Frame
- 2 - 50 ft. of Blast Hose and Fittings
- 2 - Pneumatic Safety Switch and Lines
- 2 - XL Performance Nozzle

Dim: 79.2"x48"x54"
Weight: 1100 lbs.
Air: 650 to 1600CFM

PROVEN. PRODUCTIVE.

MB185/400

GEOBLASTER® MB185/400

Comes complete with:

- Doosan C185WKUB-T4i Compressor
- GB400 Model Wet Abrasive Blasting Machine
- Dual Axle 14 foot trailer (3500lb Axles)
- 50 ft. of Blast Hose and Fittings
- Electric/Pneumatic Safety Switch and Lines
- XL Performance Nozzle

MB250/600

GEOBLASTER® MB250/600

Comes complete with:

- Doosan P250WJD-T4i Compressor
- GB600 Model Wet Abrasive Blasting Machine
- Dual Axle 14 foot trailer (3500lb Axles)
- 50 ft. of Blast Hose and Fittings
- Electric/Pneumatic Safety Switch and Lines
- XL Performance Nozzle

GEO-BLASTER® vs. SLURRY BLASTER

WHAT'S THE DIFFERENCE?

SAVE DAILY

up to **\$306.00**

	GEOBLASTER®	SLURRY
CONSUMPTION	750 lbs	2,100 lbs
ABRASIVE COST	\$150	\$420
ADDITIVE COST	\$36	\$72
TOTALS	\$186	\$492

SAVE WEEKLY

up to **\$1,530.00**

	GEOBLASTER®	SLURRY
CONSUMPTION	3,750 lbs	10,500 lbs
ABRASIVE COST	\$750	\$2,100
ADDITIVE COST	\$180	\$360
TOTALS	\$930	\$2,460

SAVE MONTHLY

up to **\$6,120.00**

	GEOBLASTER®	SLURRY
CONSUMPTION	15,000 lbs	42,000 lbs
ABRASIVE COST	\$3,000	\$8,400
ADDITIVE COST	\$720	\$1,440
TOTALS	\$3,720	\$9,840

YOUR BOTTOM LINE!

365 Customer Support

We have over 50 years of combined blasting and coatings experience. When you speak with someone at GEOBLASTER®, you are speaking with an experienced contractor. Three generations of manufacturing and fabrication expertise allow us to build the best Contractor-Proven Wet Abrasive Equipment.

Whether you are adding equipment to your existing fleet, or completely new to the surface prep industry, we are always available. GEOBLASTER® is committed to providing the best in customer service and support.

Available to our customers *before, during* and especially *after* the sale.

365 Days a Year!

* Abrasive Consumption
350lbs/hr - SLURRY BLASTING
125lbs/hr - GEOBLASTER®
* Abrasive Price @ \$0.20/lb = \$10.00/50lb Bag
* HOLDTIGHT 102 @ \$40.00/Gallon
* 5 Day work week, 6 total blast hours per Day
