This Revision to a Request for a Standing Offer No. One (1) is raised to include the following questions and answers.

The following Addendum to the tender is effective immediately. This addendum shall form part of the contract documents.

**All other terms and conditions remain the same.**

Addendum No. 1.

**1. Questions and Answers**

Q1 -1 The description in Annex A, of Item 4 (e) is, "Resistance to Abrasion (Los Angeles Abrasion or Micro Deval)". In item 4.2.1. of Part 4 of the Terms of Reference document however, only the LA Abrasion test method is referenced. Can you please clarify whether or not the Micro-Deval test is a suitable alternative to the LA Abrasion in all cases.

A1-1 Micro Deval is method of choice.

Q1-2 The description in Annex A, of Item 4 (i) is, "Soundness: Coarse & Fine". Can you please clarify whether the rate is to be for (a) both a fine and a coarse soundness test or (b) either a fine soundness test or a coarse soundness test.

A1-2 Rate to include the cost to determine both Coarse and Fine soundness of materials.

Q1-3 It is assumed that for laboratory testing items listed in Annex A, such as 4 (f) Compressive Strength of Cylinders and 5 (h) Compaction by Coring, the rates to be provided are for the laboratory testing only and the associated sampling and field work are in addition. Is this correct?

A1-3 Correct.

Q1-4 The description in Annex A, of Item 5 (h) is, "Compaction by Coring". Is the rate to be provided the rate for a single core specimen, or a set? If the rate is intended to be for a set or cores, how many cores constitute a set?

A1-4 Rate provided is per single specimen.

Q1-5 The description in Annex A, of Item 7 (b) is, "Specific Gravity". Is the rate provided to be a rate that is acceptable for both coarse and fine sample testing or is one of either coarse or fine samples intended? If only one of either coarse or fine samples is intended, for which should a rate be provided?

---

A1-5 Please provide a single rate to determine Specific Gravity that is acceptable for coarse sample or fine sample.

Q1-6 Item 2.1 of the Terms of Reference document reads, "The cost for transportation of concrete cylinders and mortar cubes to and from the site will be paid on invoice and will be included under the provincial amount for travel." It is understood that the province has a set rate per kilometer for travel reimbursement, which it sounds like is to be used when picking up test specimens. Is the time required for pickup not reimbursed? If so, at what rate is the pickup time billed?

A1-6 Last sentence Item 2.1 should read ``The transportation of concrete cylinders and mortar will be reimbursed under hourly in transit rate for Technician. ``
