ADDENDUM

Project: West Coast Trail Bridges Repair

Addendum No.: 001

Project No.: R.064182.001

Requisition No.: EZ899-151713/A

January 8, 2015

GENERAL

This Addendum forms part of the Contract Documents for **Project No. R.064182.001** and amends the original drawings and Specifications. The following revisions supersede the information contained in the original drawings and Specifications issued to the extent referenced and shall become part thereof. No adjustment to the Contract Price will be considered or allowed due to the Contractor or to any sub-contractor or supplier not being familiar with this Addendum.

Clarification:

1) Is there a way to visit the bridge sites with the trail not being opened till May 1st?

Answer: Parks Canada is able to allow someone to access the specific bridge sites under the following conditions:

- at their expense and risk
- the Parks representative will not be available for the visit, nor for the time of transportation
- with the understanding that Parks Canada is not equipped to rescue anyone at this time of year
- they must inform the park and apply for a permit that must be approved by the park superintendent Phone: 250-726-3500 Fax: 250-726-3520
- the risk to access the bridges by walking along the trail at this time is too great to allow anyone to do that.

Note: In past years all other contractors for similar bridge repair contracts accessed the bridges by a helicopter. Note, certain amount of hiking/ladder climbing would be required to access the bridge sites from the helicopter landing point, which is, at the discretion of the helicopter pilot, usually selected somewhere along the beach.

2) As per item 5.3 general instructions time of completion is set for 16 weeks after contract award which would bring the completion date to early late May. However much of the contract is in stream work which cannot begin until June 15th. Please clarify.

Answer: Construction period to be modified to 12 weeks after contract award.

None of the work is directly in-stream, therefore all work to be completed within 12 weeks after the contract award, before the season is open on May 1st. Potentially, the only in-stream work could occur during abnormally high water levels caused by flooding, which is not likely.

End of Addendum
