AMENDMENT 002

This Amendment is raised to respond to questions posed in response to the RFP.

Q7. Can you expand on what you mean when you say "RMC's Operational Needs"? This is found in the answer for Question 2 of the Amendment 001 page.

A7. We are not a production shop. Operational requirements mean that if we have a machine that is versatile with a 1) High Definition quality and 2) a variety of materials, RMC Staff will find uses for it in courses and for research projects. A high quality part for use is what we desire.

Q8. What kind of service coverage is necessary for the device? For example, do you need someone on call 24/7? Do you need someone available on weekends? Or do you just need someone Monday-Friday 8AM - 5PM?

A8. We require mon to fri. If we have a machine malfunction which requires parts and service, we need it promptly. We might be making parts for a course that has a deadline. But we only require service normal business hours.

Q9. Are you looking to expand on, or replace, machines currently used in your rapid prototyping lab?

A9. We are replacing a machine that was highly unreliable and gave parts of questionable quality.

Q10. Is there a reason to bypass the steps of using heat and detergent to finish model/remove supports, versus using a water based support removal? Is it to save time? Labour? Materials?

A10. As mentioned above the machine we are replacing was highly unreliable and used wax based support. With all the furnaces, warm water with detergent etc the wax support can never be completely removed. In fact the parts tend to be porous and the wax is absorbed and then later the wax leaches out to the surface. Years later parts are still leaching wax. In the end by not using wax based support we feel we will be able to supply a higher quality part.

ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED
